About Legacy Network

Legacy Network is an international technology company based in Liechtenstein.

Our Aim is to sustainably improve people's lives by developing innovative technology and building international communities around **personal development**. We firmly believe that personal development is the key to success in all life areas, as well as the solution for many global problems. For this reason, we committed ourselves to find new ways in order to provide something of true value to the world.

Through our **structured & gamified** app, users collect **rewards** in form of digital tokens as they successfully progress along their journey.

Using our proprietary AI technology, we are able to guide our users and **optimise** their learning path.

Our Vision

Our vision is to create the world's **biggest personal development ecosystem** with our technology as the gate to a successful and fulfilling life. Great technology should work for the user, not against him. We live in an era, where big tech companies know much more about us and our psychology, than we do. This valuable data is used to sell us more products and to make us neurologically addicted to certain services. We aim to create **a technology, which collects the same data but provides it to the user.** A technology, developed to give people deep insights into the **programming** and functionality **of their own brain** along with **individual and playful step by step guidance** on how to use the new gained knowledge in their own favor.

Initial Position

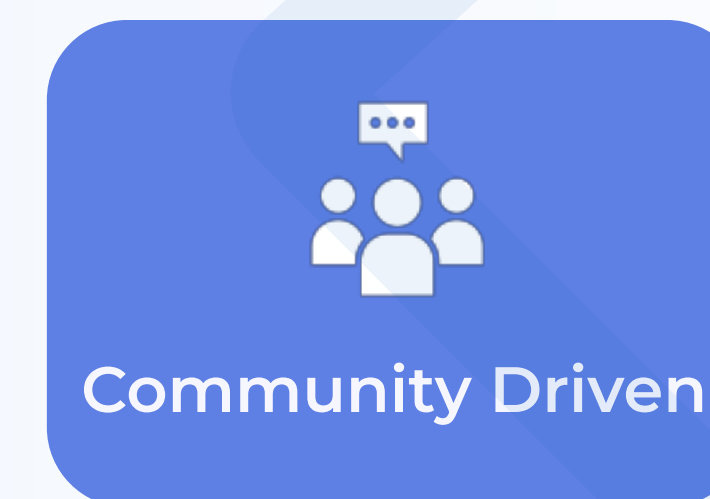

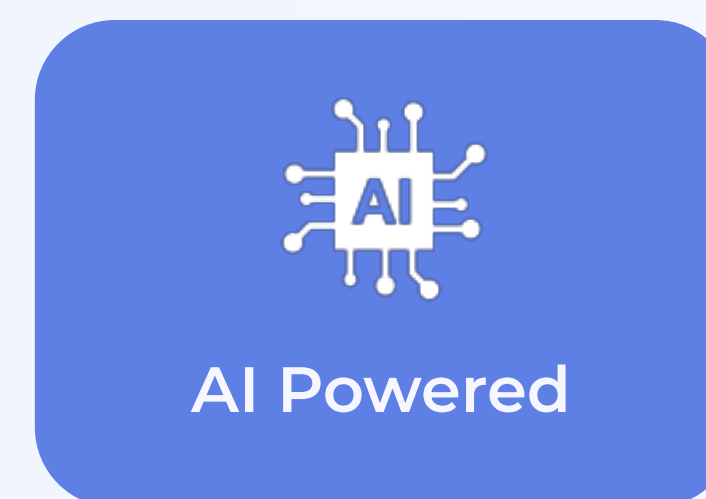

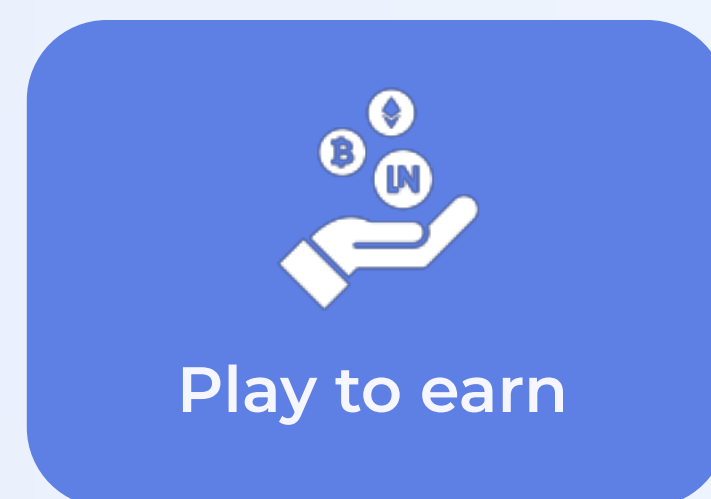

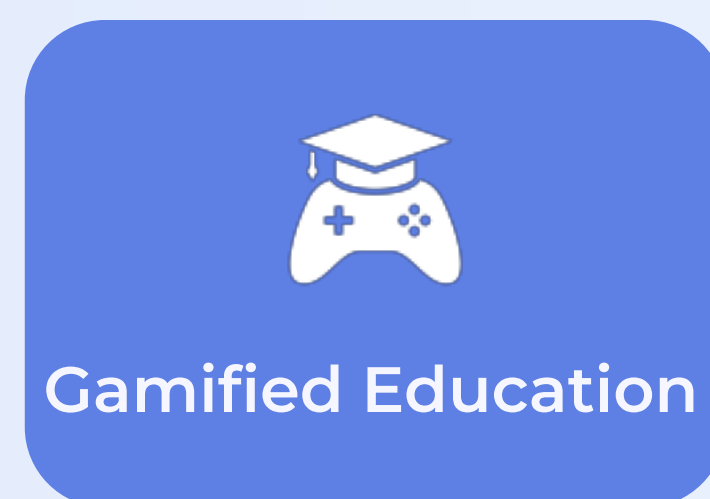

As things stand today, **over 35% of people in Europe suffer from a mental illness that requires treatment.** This does not include harmful behaviors and traits that severely limit a person's quality of life but are not recognized as an illness. The average person today is plagued by: Diverse **anxieties, sleep disturbances, recurring negative emotions** as well as **poor physical condition.** These matters in turn negatively impact his success in various key areas of life. We humans tend to perceive certain circumstances as "not so bad" as far as most of them are concerned. In reality, the facts mentioned have **disastrous consequences** both for the individuals affected and for society as a whole.

Aggression, hatred and crime in society are largely **due to frustration.** Frustration, in turn, can primarily be traced back to a lack of success in important areas of life. The main reason for the problem described lies primarily in **the human preference for short-term rewards over long-term success,** happiness and long-term health as a basic state. In general, today's **average person** is trapped **in a state of aimless distraction** and lacks the strategies and resources necessary to escape this state.

Our Approach

We are developing a logical and scientifically based play-to-earn system that explains the user's own behavior and that of those around him in a playful way and teaches them effective life strategies step by step. The user learns important skills that support him in actively and independently leading a fulfilling and successful life. The content is mainly from the areas of psychology, sociology, neurology and biology. The content comes from experts and is subject to strict quality control. With the play-to-earn system we want to ensure that the user does not find the learning process a burden.

Even though we don't have direct competition technically, we still compete with other companies for users' attention. A major problem of our time is the neurological dependence on dopamine, or the short-term reward release in the brain. By designing our system to create a **dependency, in this case positive**, we ensure that our ecosystem is actively used and **the user maintains their motivation.**

Personal Development

The foundation of your life

What is Personal Development?

Personal development refers to the process of **improving yourself**, your skills, knowledge, and abilities in order to reach your **full potential**.

- Having a clear **understanding of your thoughts**, feelings, values, and behaviours, and how they impact oneself and others.
- **Personal growth** refers to the continuous process of learning and improving yourself, both personally and professionally. This involves setting and achieving goals, learning new habits and expand your skills.
- It's a process that takes **time and effort**.
- Having a **sense of purpose** and direction that you derive your values, goals, and passions from. Finding and pursuing your purpose and meaning can bring a sense of fulfilment and satisfaction to your life.

Why is Personal Development Important?

We humans tend to believe that we don't have much control over our destiny. We think that our potential is as limited as our possibilities are. In reality, these beliefs are an illusion. Our success/happiness is a direct reflection of our personality and our personality is a direct reflection of our individual programming. This programming includes our **beliefs, thoughts, habits, behavior patterns and our neurological conditioning**. It controls everything. How we approach certain challenges, how quickly we recover from setbacks, how we react to different situations, etc. It also determines our **level of self confidence, self-love, resilience, assertiveness, discipline, emotional control, and more**.

These traits, in turn, lead to **success in career/finance, romantic relationships, platonic relationships, health, and all other important areas of life**. Many people find themselves in a reactive position. This means that they are not acting but reacting. Basically, they wait to see what happens next instead of actively shaping their lives. The reason for this is on the one hand hidden fears, and on the other hand a lack of feeling for one's own possibilities of influence. Conscious personality development can help here.

The Biggest Hurdles

To Personal Development

Understanding

It's essential to understand the key pillars as well as what is the **most up to date peer-reviewed science** behind this industry.

By lacking understanding, many people will end up doing the wrong things and **lose motivation.**

Planning

Personal development can be viewed as a **marathon** rather than a sprint.

In order to be successful, it's crucial to plan ahead.

A strong plan allows for a **structured road to success.**

Discipline

Improving yourself is hard work. **It doesn't come easy.**

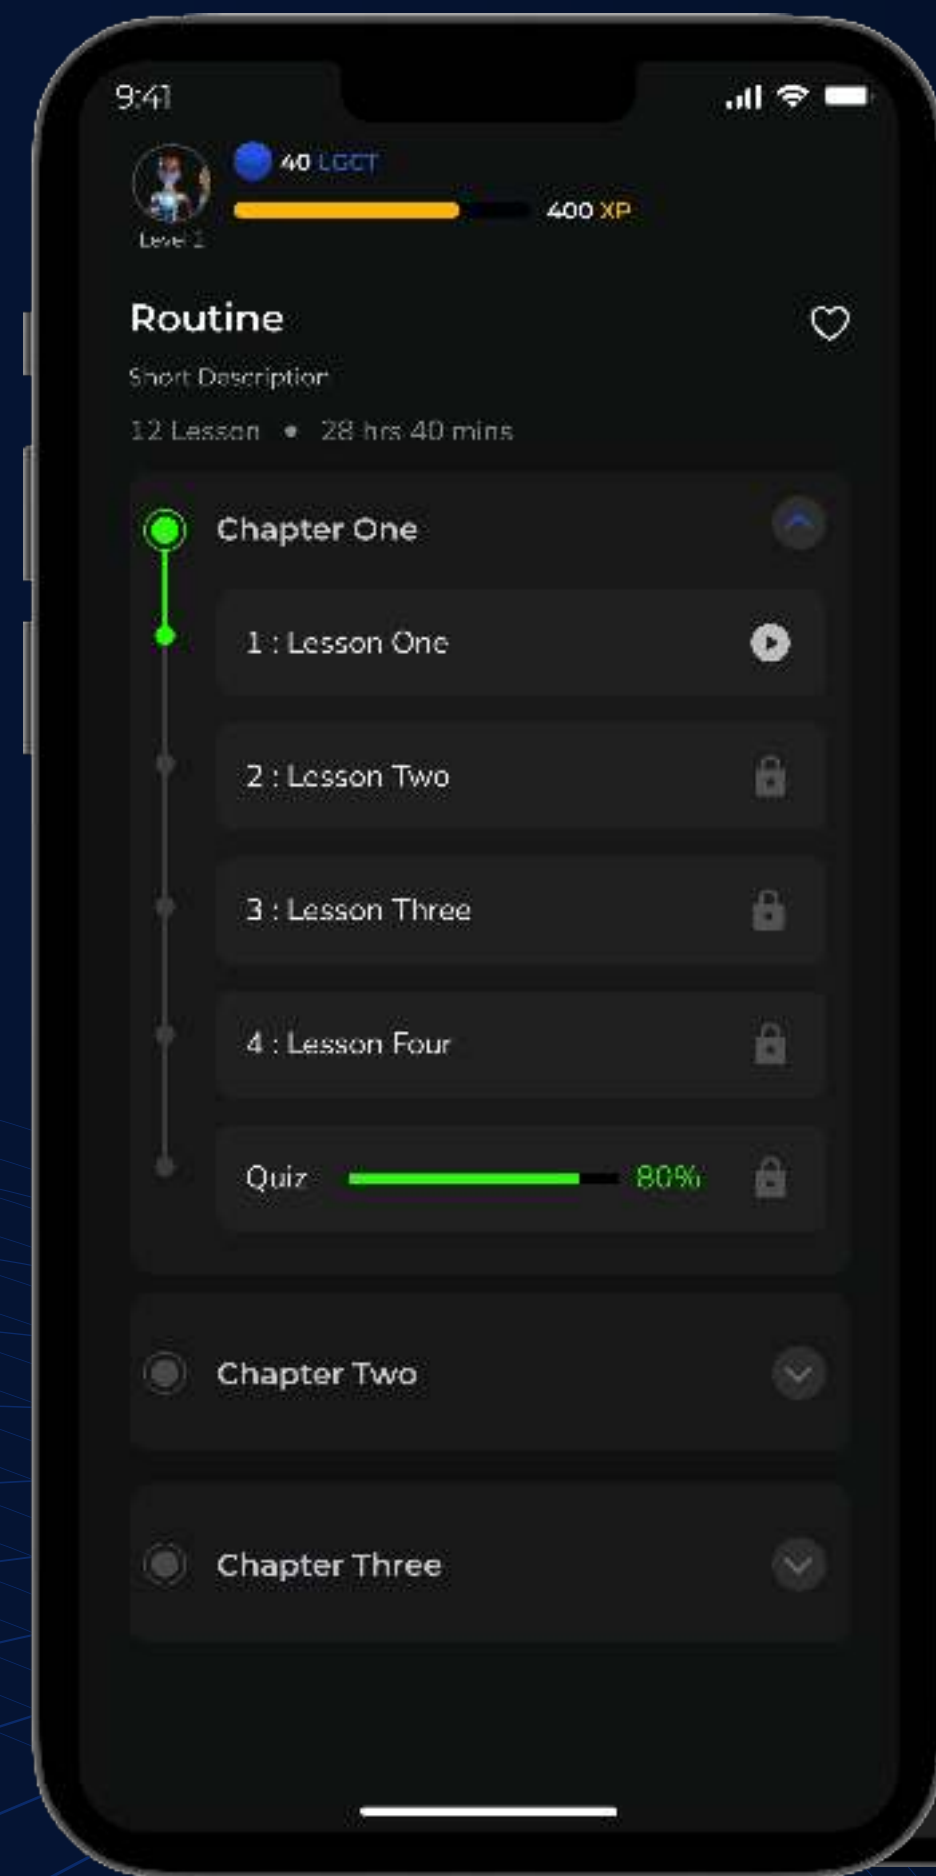

Many people start with a lot of motivation, but only to lose it all after a week or two.

How to be **consistent over time** is the key to progress.

Open Mind

During your development journey, you will be faced with and forced to **question yourself, question your actions and beliefs.**

If you want to change, you must be able to **accept that you were wrong** and open to embrace new ideas.

Legacy Principles

Create your own Legacy

The Concept

Education

With the Legacy app, users will build the knowledge they need to **improve** their daily lives.

The content is delivered in the form of **short modules** followed by a quiz.

Network

Users will join a community of **like-minded** people that share a common goal of becoming the **best version** of themselves.

Guidance

Legacy provides a **structured** journey where the user is guided, **using AI** to achieve his set objectives.

The Pillars

We provide a holistic approach that is based on **3 core pillars**.

1 MINDFULNESS

Mindfulness is a key component of personal development.

Clarity; Rational & Strategic thinking; Mental **Sharpness**, Awareness.

2 EMPATHY

Life is a reflection of oneself. External conditions mirror internal ones.

Understanding; Positive thinking; Optimism, Tolerance, Kindness.

3 DISCIPLINE

Discipline is the way to transform the intangible into **tangible**.

Confidence; Courage; **Strength**; Determination; Willpower, Control.

OUR METHOD

We combine the teachings of different philosophies.

- Stoicism
- Growth mindset
- Positive psychology

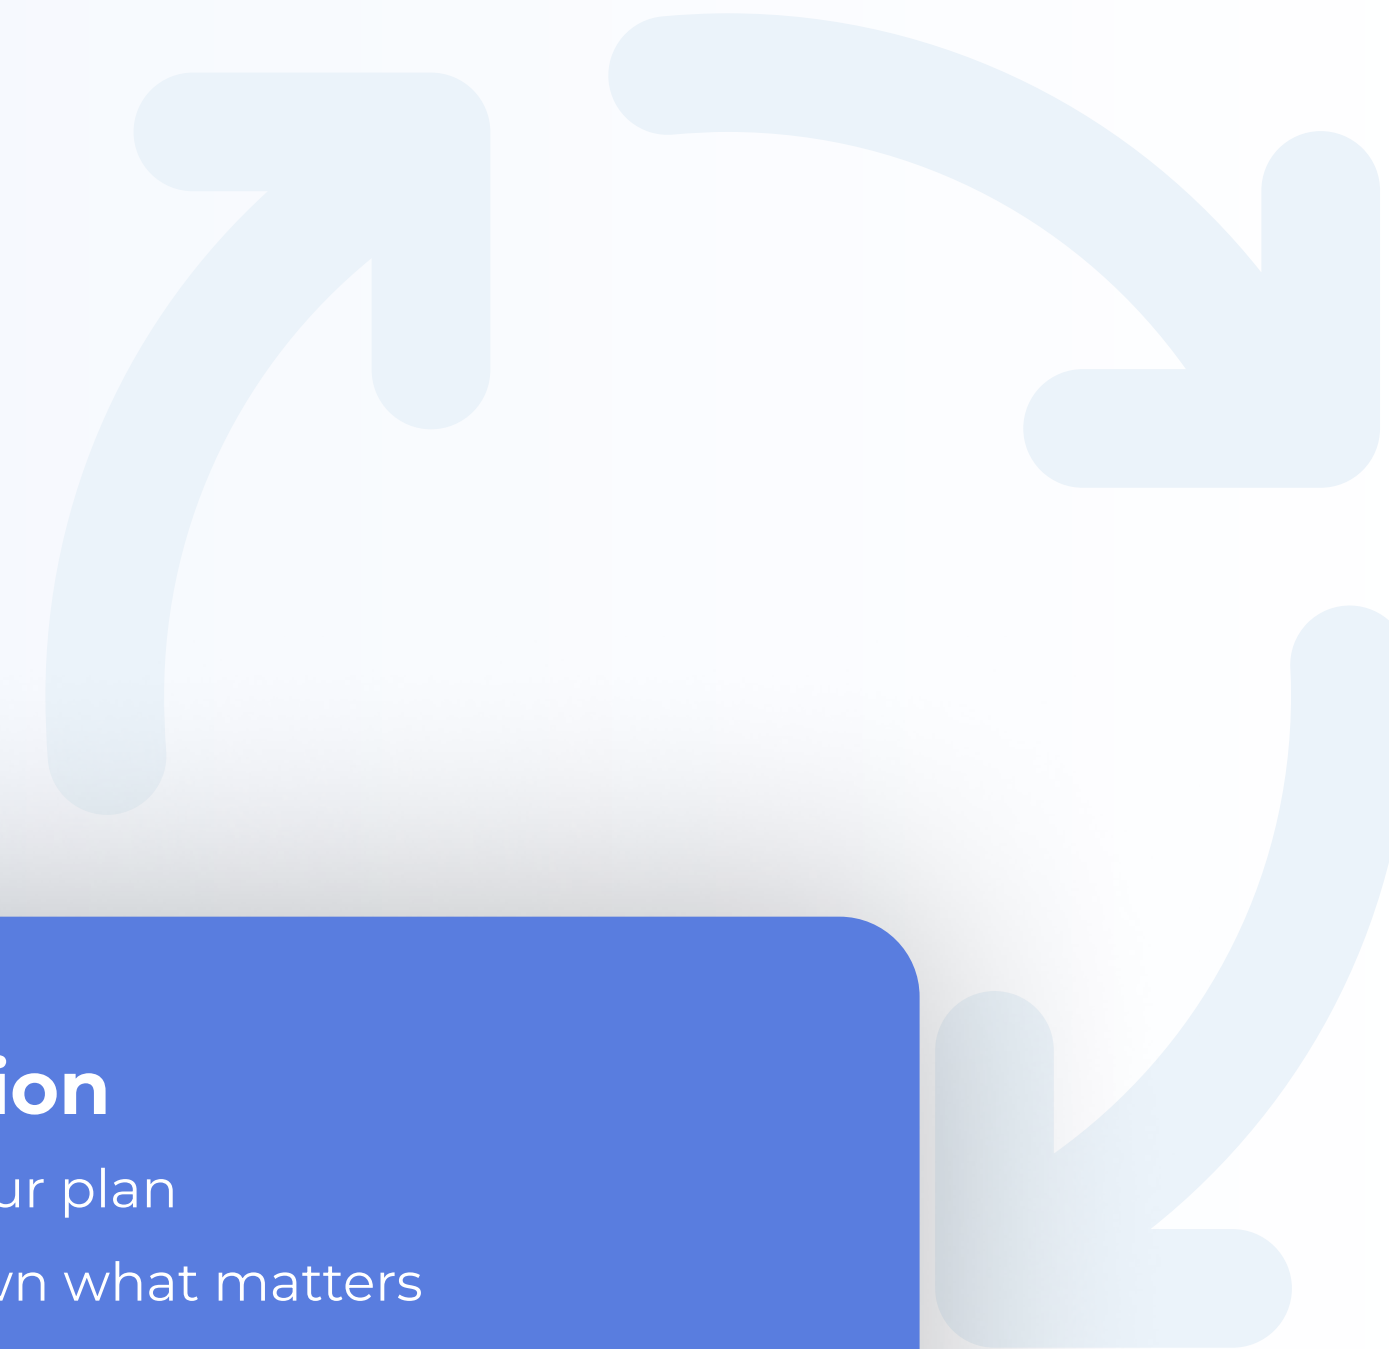

And turn them into **easy to understand** insights; and **actionable** steps.

THE BENEFITS

- Physical health - **feel better** inside & outside.
- **Mental health** - be sharper and more efficient.
- Relationships - Improve **human** interactions.

The Process

Users are guided through a structured process that helps them build the routine & discipline required to achieve their goals

1

Understand the basics of PD

- Understand each pillar & what they mean
- Learn what's currently taught
- Understand the overall PD space

2

Understand yourself

- Understand your mind
- What are your strengths & weaknesses
- What are your goals
- What is your dream/vision

3

Take action

- Create your plan
- Write down what matters
- Set your goals

4

Create a routine

- Break tasks into smaller pieces
- Be prepared
- Randomised rewards

5

Build discipline

- Journaling
- Strict agenda / ToDo list
- Don't think, just do

6

Never stop learning

- Build knowledge like layers
- Keep an open mind
- Learn 1 new thing each day

The Network

Be Part of the Legacy Tribe

- Join like-minded people
- Exchange of value & knowledge with the community
- Get support from a base of active entrepreneurs & builders

How It Works

Open discussions

We create an environment where members can discuss ideas and concepts freely with one another.

Community Boards

Through our website, users can share ideas & information with the rest of the community. The boards are open & collaborative.

Live discussions

To promote dialogues & knowledge, we organise periodical live sessions and encourage other members to create their own sessions.

The Impact

With understanding & practice, users will be able to improve **all aspects of their life**, from work, to personal relationships and mental strength.

Business

- Improving communication, **leadership**, time management, problem-solving and decision-making skills.
- Increasing self-**awareness**, and understanding one's strengths and weaknesses.
- Improving work dynamics with colleagues, customers, and clients.

This ultimately results in **better performance** in the workplace.

Relationships

- Improving communication, empathy, and **emotional intelligence**.
- Understanding one's own needs and boundaries, and making **healthier** choices in relationships.

Emotional intelligence can help individuals manage their **own emotions** and respond appropriately to the emotions of others, which can **improve** the dynamics of their relationships.

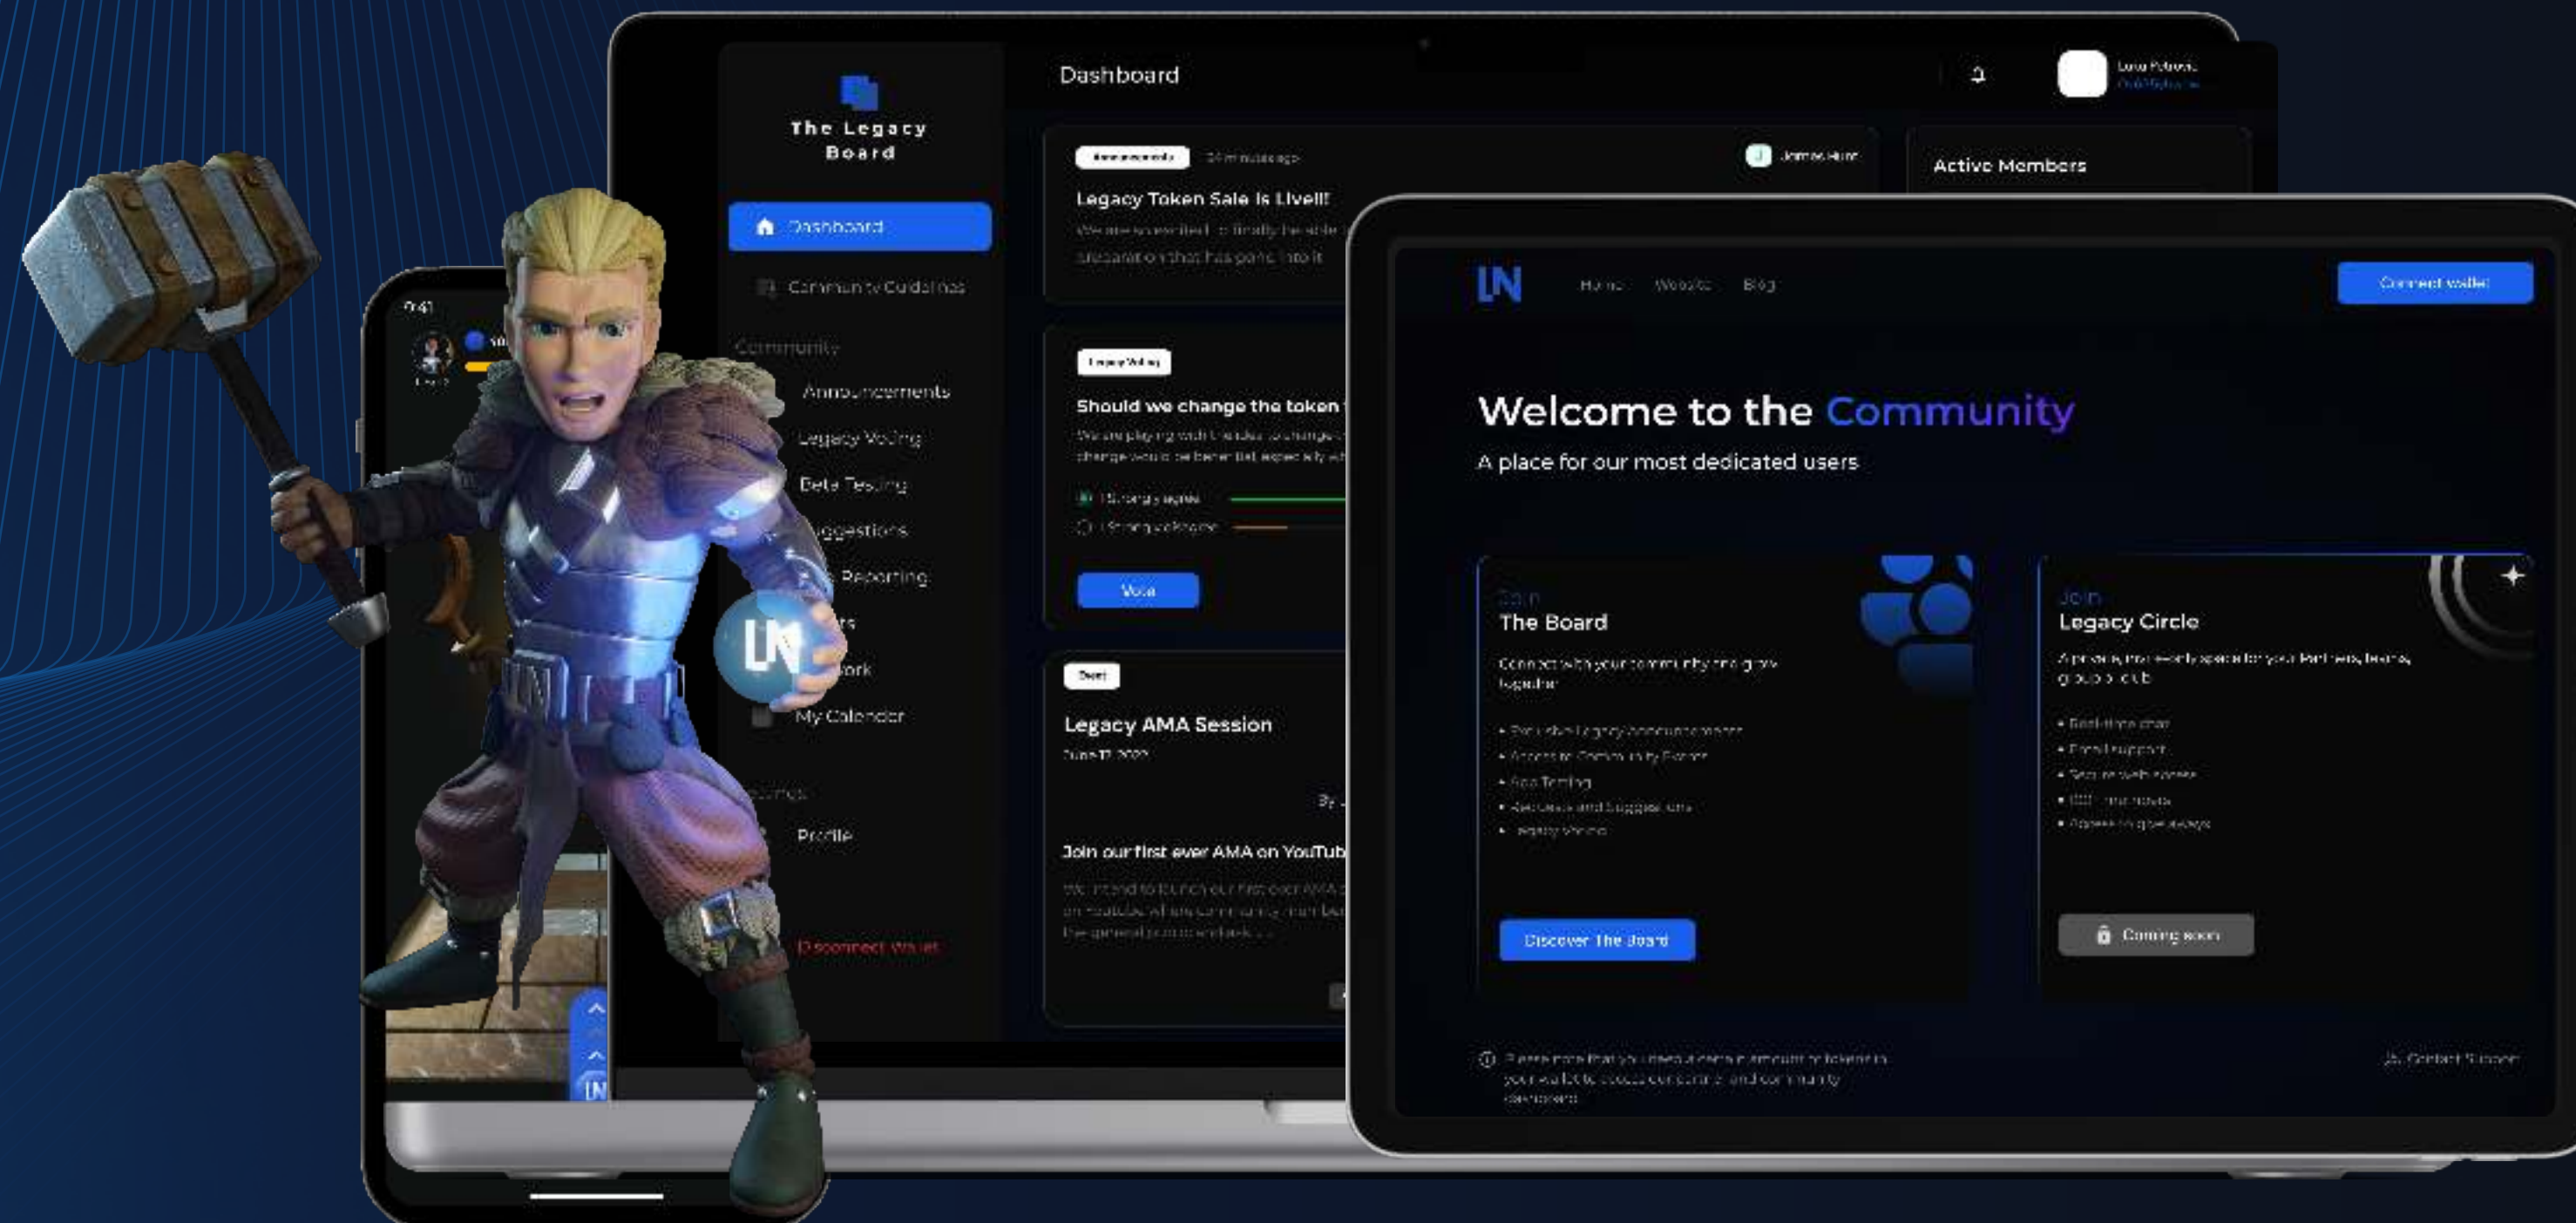

Mental Strength

- Building self-awareness, **self-esteem**, self-respect and self-efficacy
- Setting and **achieving** goals
- Developing positive self-talk and overcoming limiting beliefs.

As individuals achieve more and feel more in control of their lives, their confidence in their own abilities will **naturally increase**.

Legacy Products

● Legacy Boards

● Legacy Health

Legacy Academy

The future of education

Functionality Summary

The AI uses targeted questions, user behavior, feedback, app tracking and other parameters to decide how advanced the user already is and **which content is relevant to him**. This makes the system **usable for everyone**, whether beginner or professional. In the App the user can **choose from various categories**. Each category contains content, which can be text, video, animation, podcast (audio content) and other forms. **Each category has its own level system**. The content consists of both a **theoretical and a practical part**. A topic is explained to the user in an understandable and detailed manner, after which the AI suggests **concrete strategies and goals** for implementation. The goals are added to the user account and the user is regularly reminded of them. If he does not achieve the goals, the **AI suggests suitable alternatives**.

A new level is reached as soon as the user has completed the current level. Prerequisites for this are:

All content must have been consumed (partially verifiable)

He must have achieved the goals of the level (partially verifiable)

He must solve a small test (fully verifiable).

Rewards in the form of tokens and experience points are distributed for passing a level.

Get Started

With our App

What

Define

Here, the user is told a fact, for example, that healthy self-confidence is important for success in various areas of life.

Why

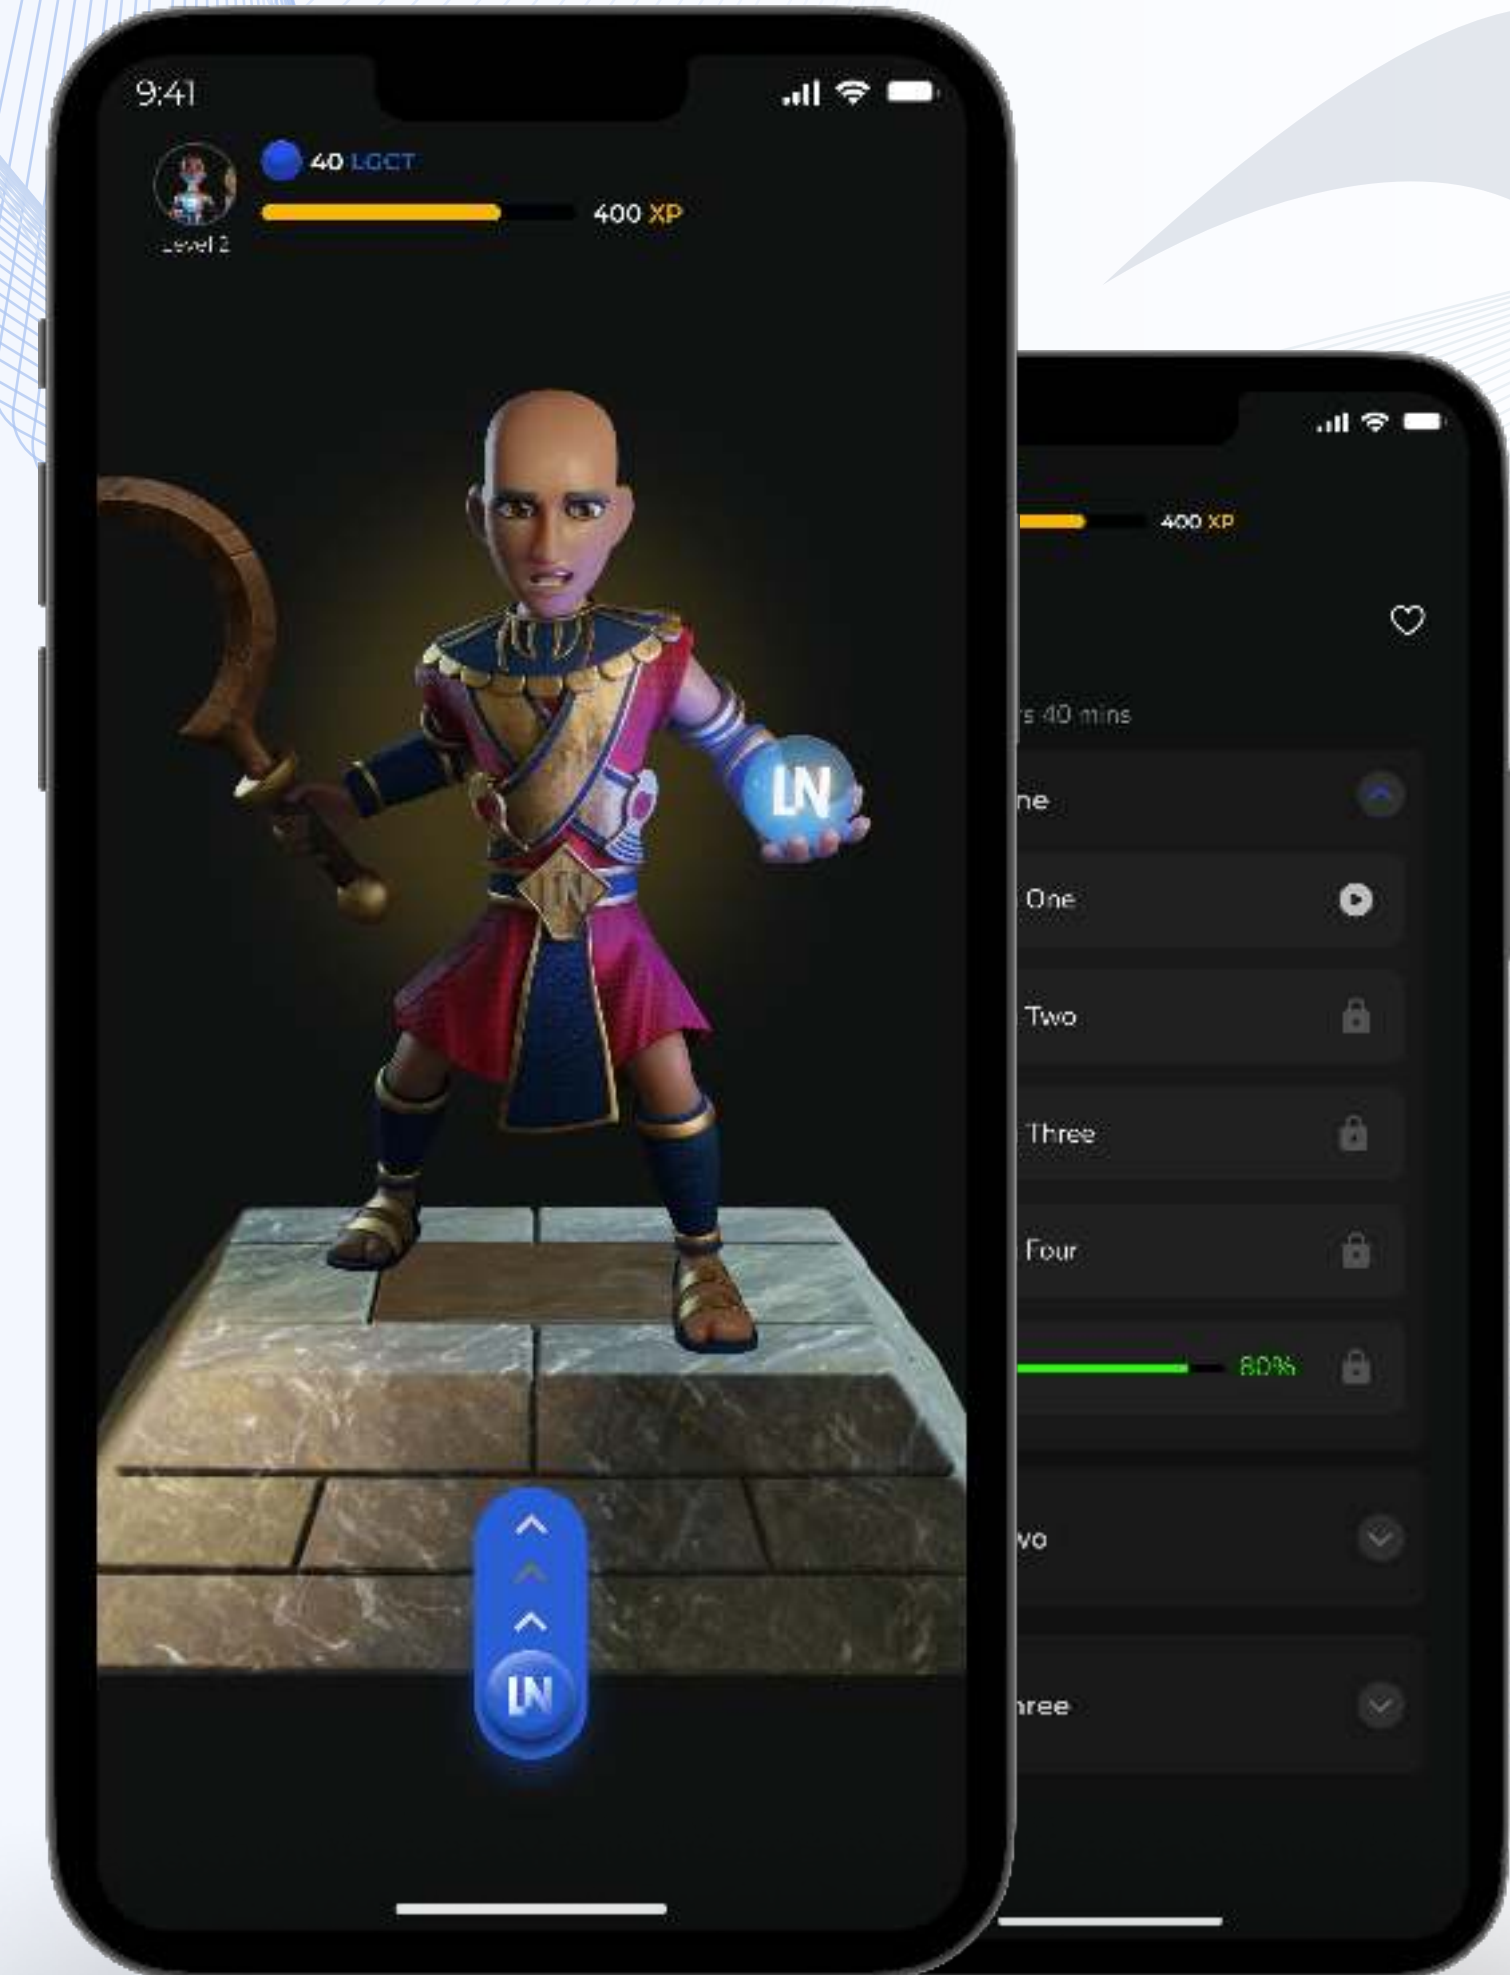

Understand

Subsequently, it is explained in detail why a healthy self-confidence is important. Understandable correlations are shown to create an "aha experience".

How

Take Action

In the last step, the user is shown concrete steps on how to acquire self-confidence. The big goal is divided into small, achievable steps. If a step is not feasible for the user, the artificial intelligence offers alternatives.

Learn Through Modules

Structured Content

Select a Module

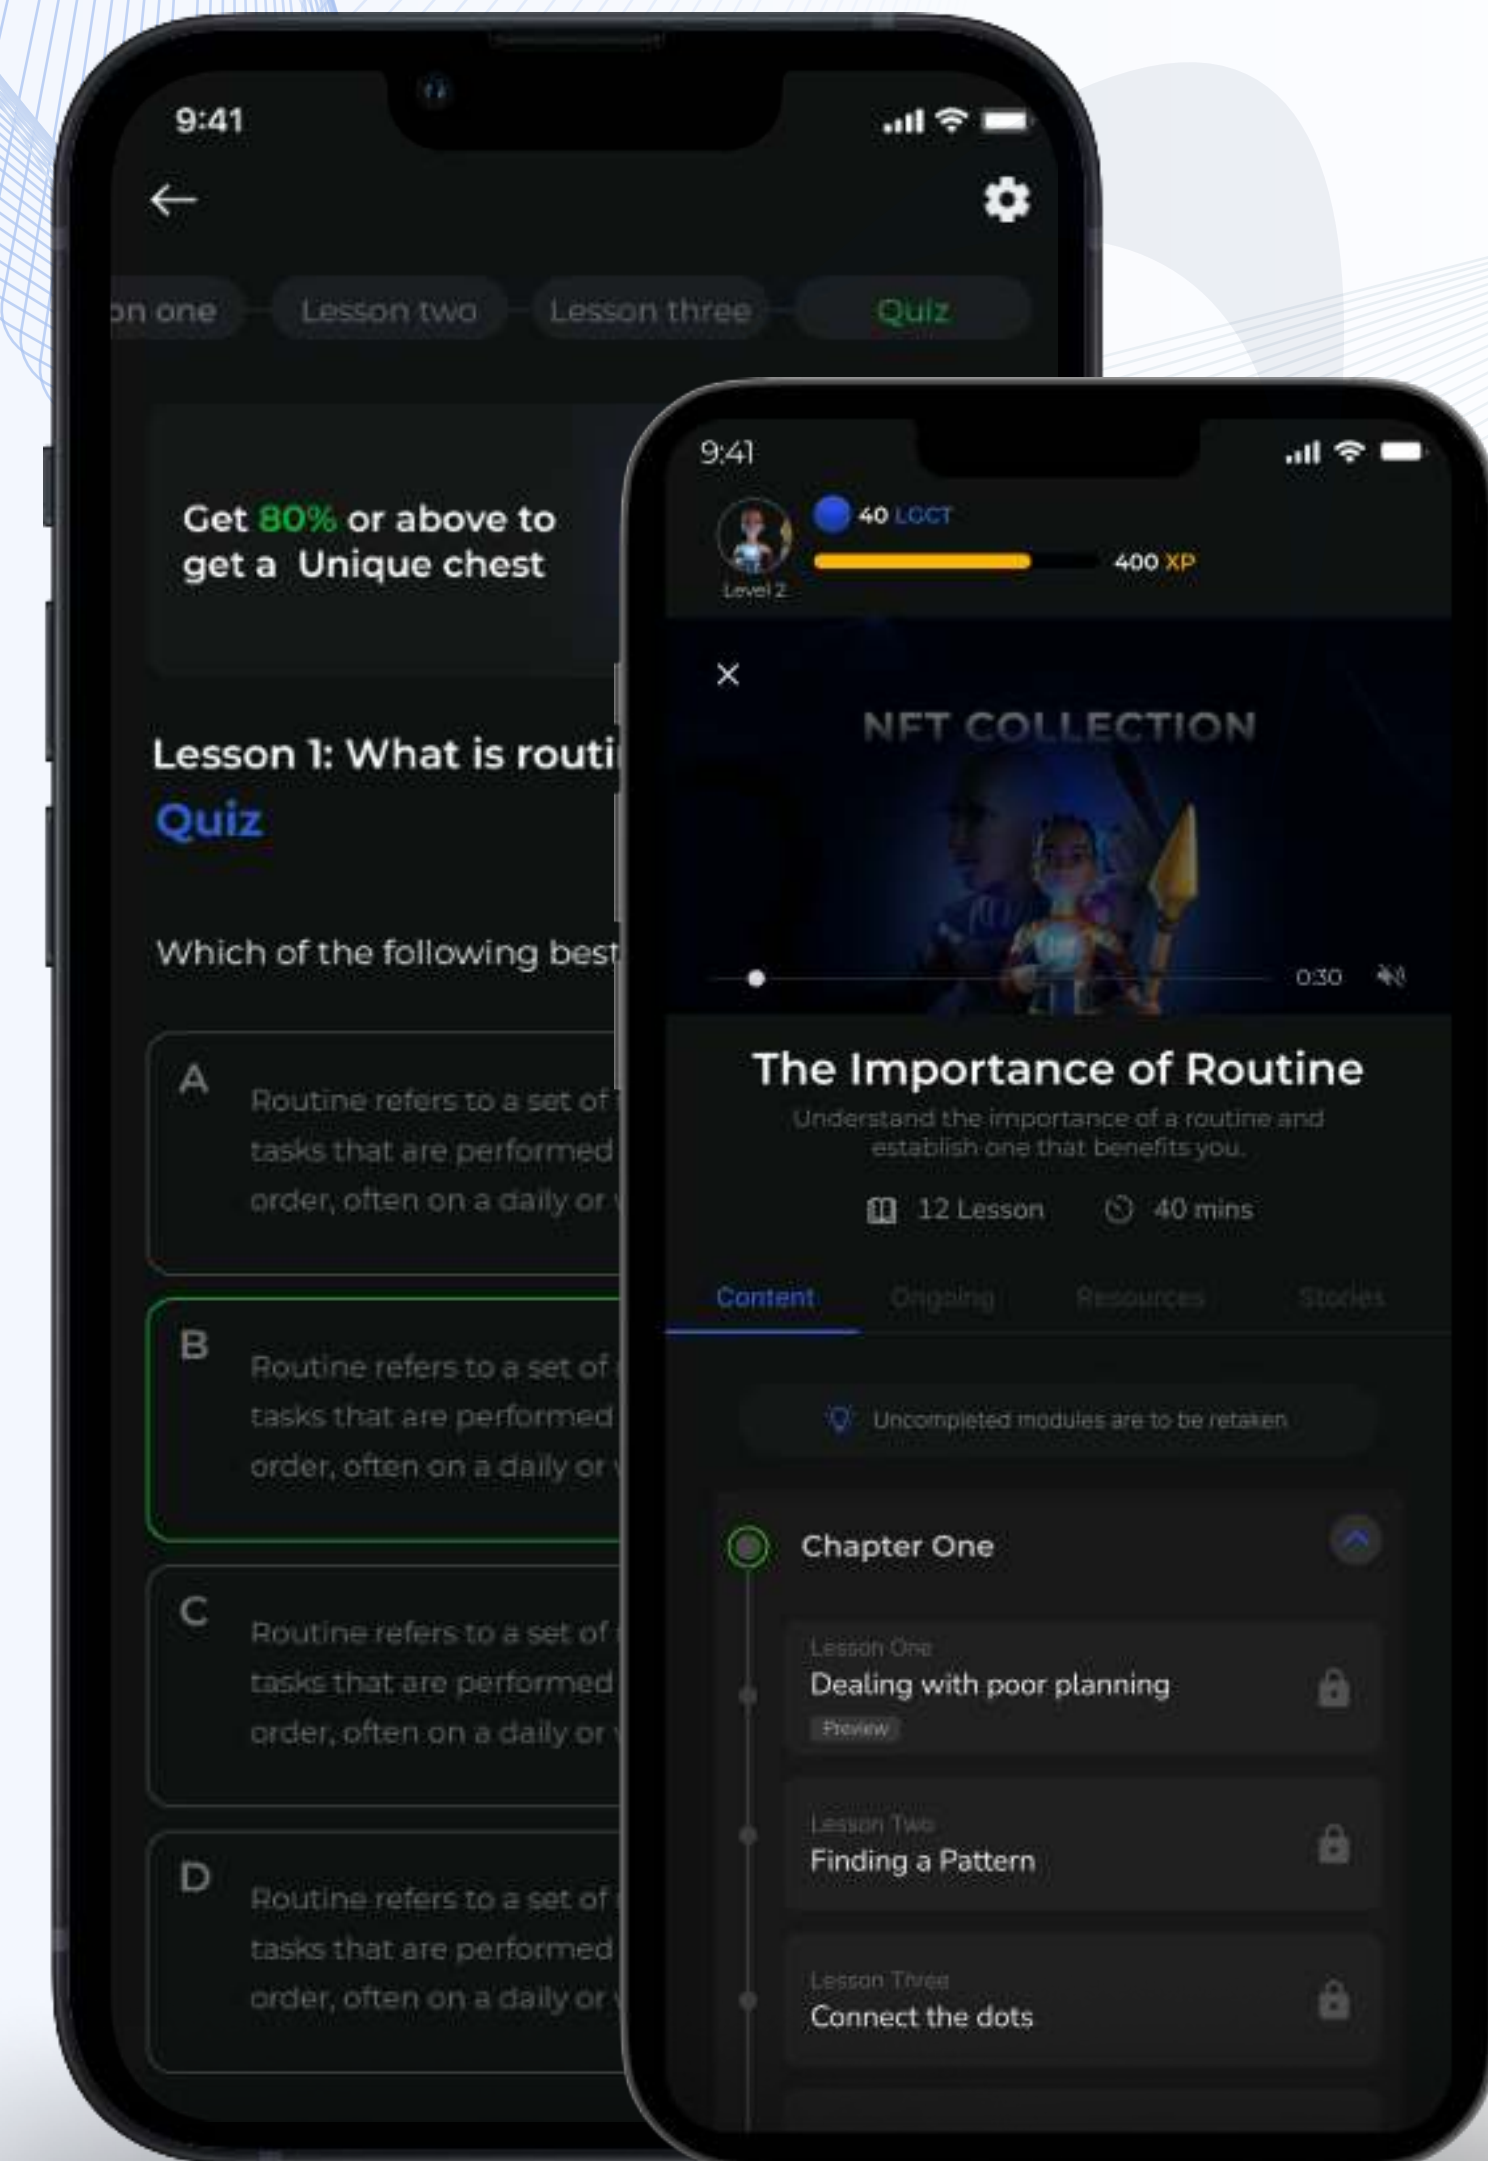

Users can choose between different topics in form of modules to learn. Each module is **structured** in order to give users a chronological flow. That allows them to build their knowledge **step-by-step** and create a **strong base** for their future development.

Play Through a Lesson

Within each topic, the content is broken down into Levels & Lessons. A lesson will focus on a very **specific concept** and will contain, a text, a visual element, and a **practical task** for users to complete.

Complete the Quiz

At the end of each module, users will go through a set of 5 questions. The objective is to ensure that they **understand the main takeaway** from each module. By repeating the key learnings, it **solidify** the user's understanding.

Daily Task

Guided Journey

Each module ends with a **practical task**.

The objective is to **Turn insights into practical steps** / actionable items

Users are encouraged to keep a journal which they will use to write down their different experiences.

Identification is the first step towards solving a problem.

Daily Task: Empathy

Throughout the day, identify 2 situations in which someone does something that **annoys you**.

When that happens, think:

- That person is not **intentionally** attempting to harm me, but is just doing the best they can to get through their day.
- That person might be going through a **difficult time**, which I am unaware of, and I should forgive them for their actions.

Before going to bed, **write down** these 2 situations in your journal and reflect on how you could have done **similar things** if you were in their position.

Gamification

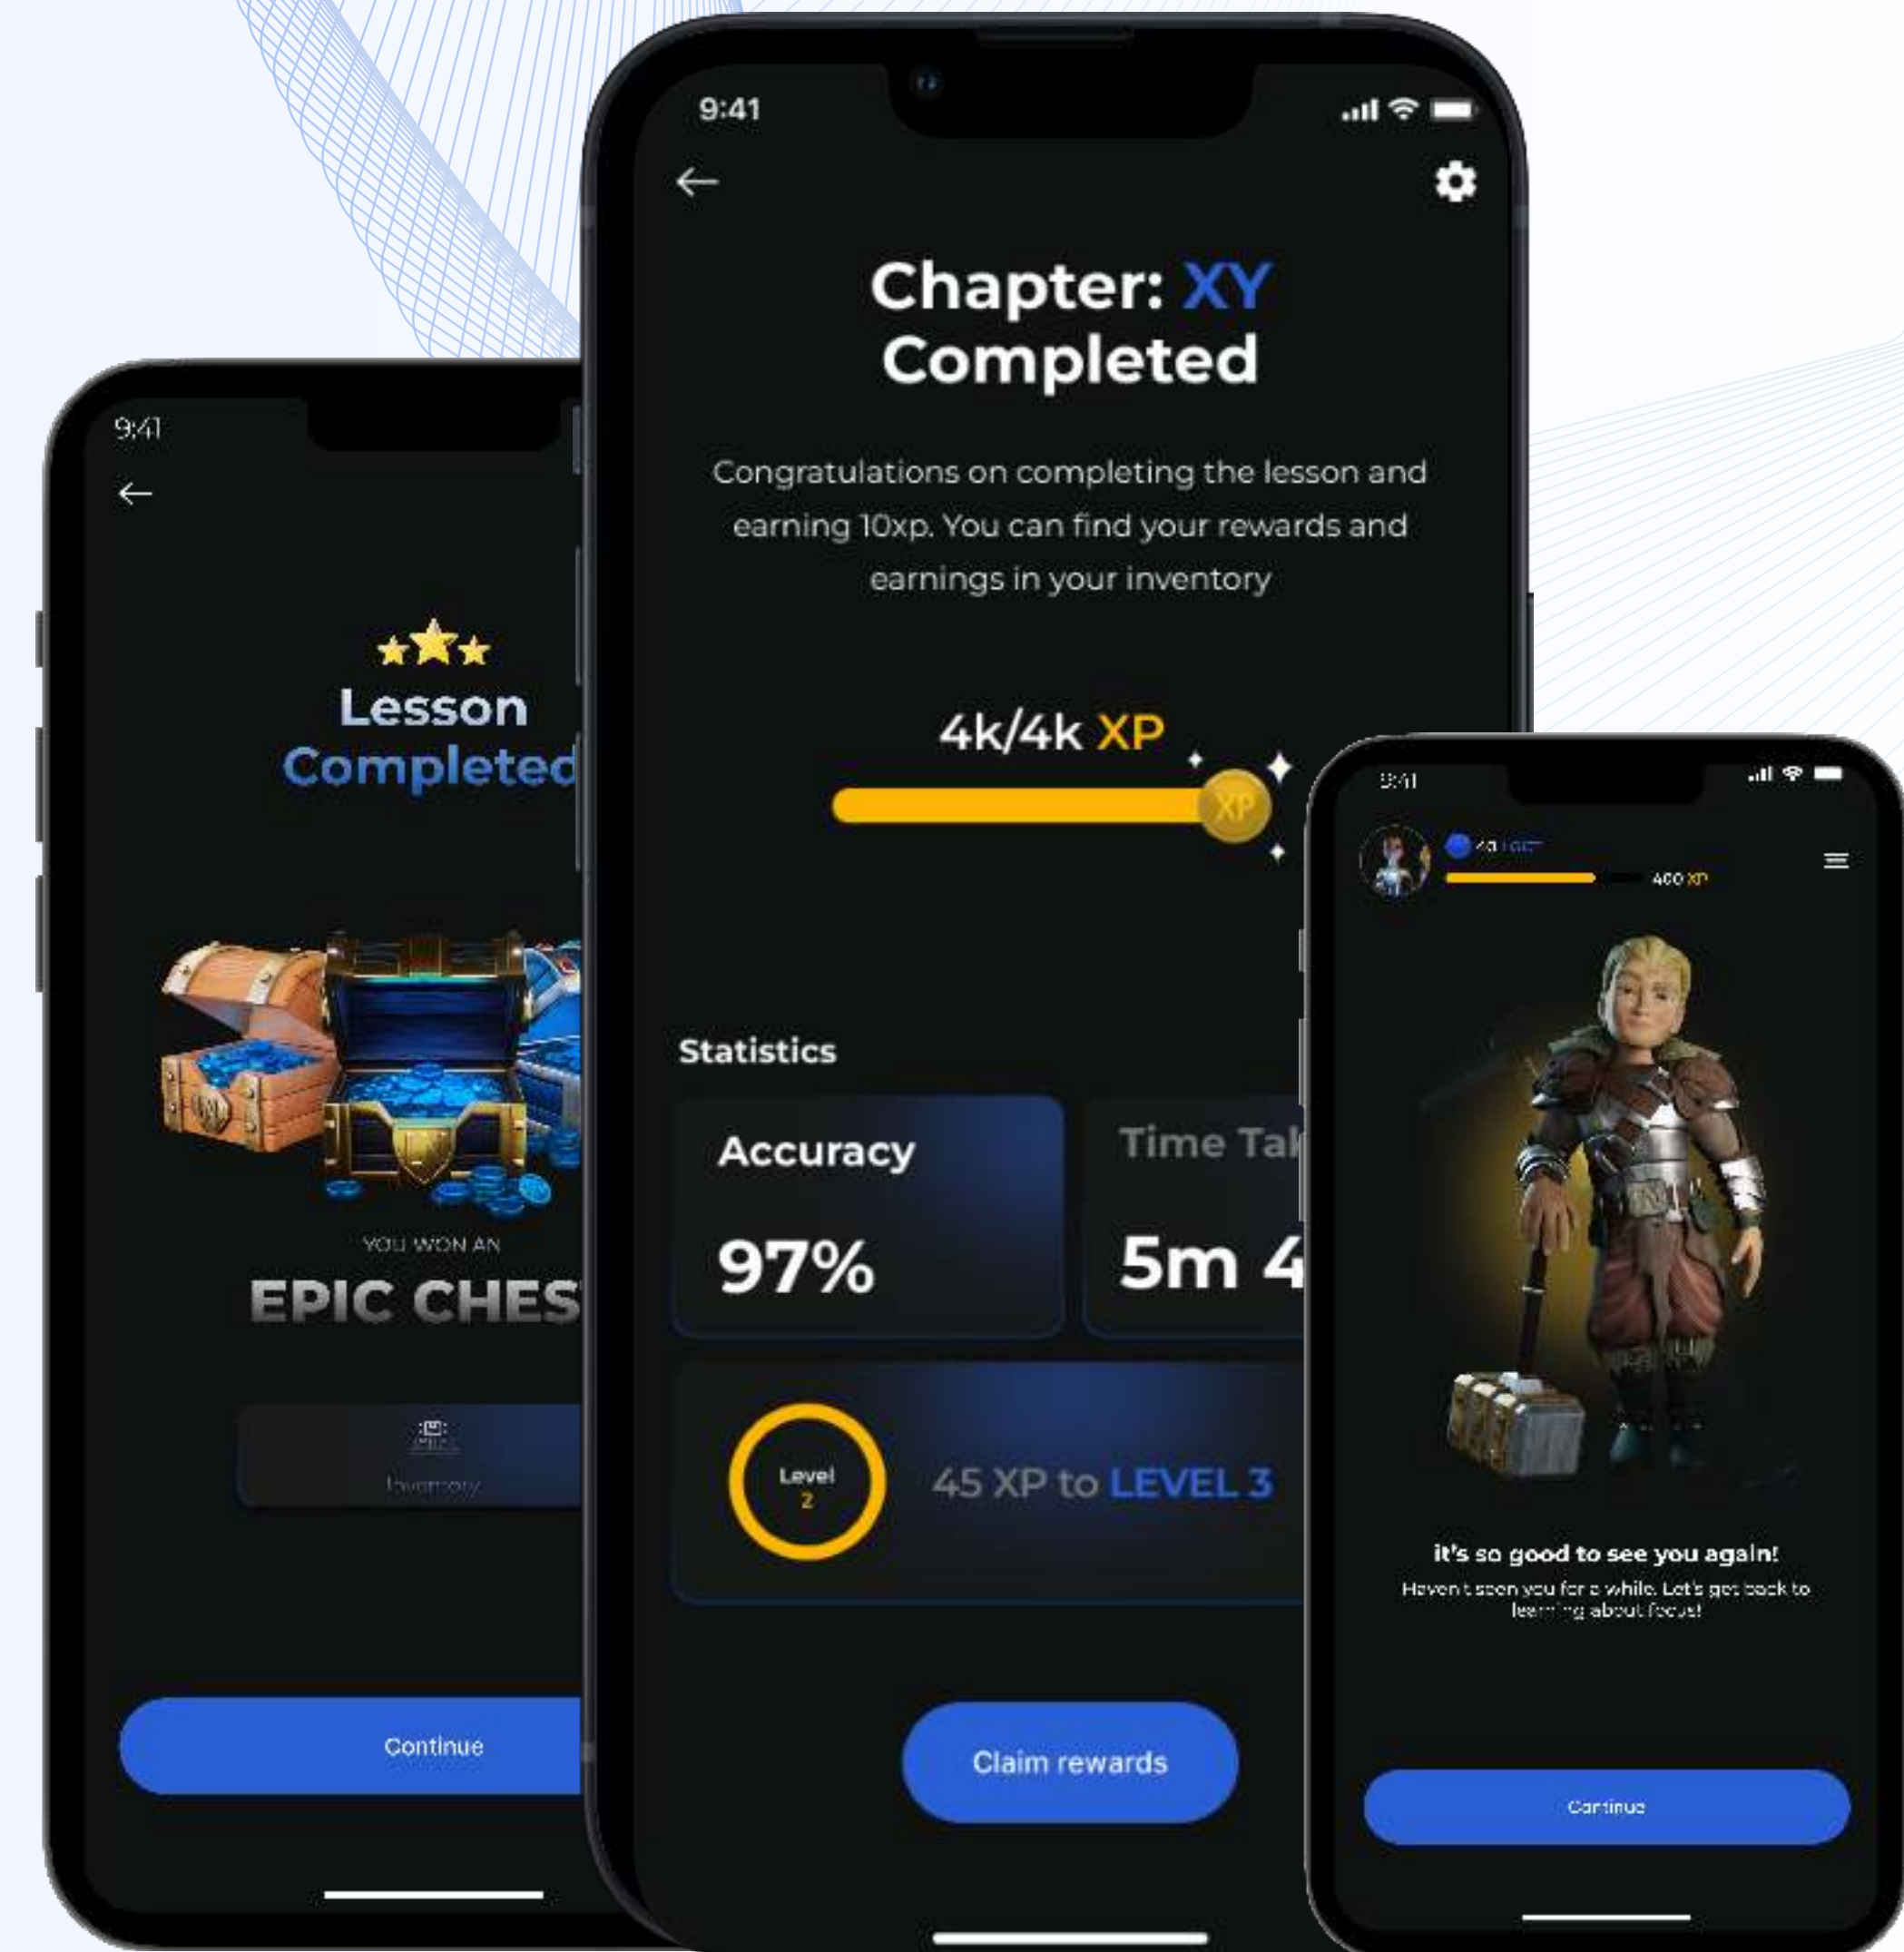

Social Learning

Rewards

Each module offers users rewards in the form of LGCT, the native token of the Legacy Network ecosystem. The reward will be greater the better the user performs on the test. The objective is to incentivize users to think and remember what they have just learnt.

Leaderboard

The objective of Legacy Network is to make learning fun & engaging. We believe that social learning will be a key trend with younger generations. This will also drive growth to the platform as users are incentivized to onboard their friends.

Artificial Intelligence

For the User

Our artificial intelligence evaluates the collected information about the user and utilizes it to deliver **individual and effective solutions**. Over time, the AI turns into a **personal coach** which knows more about the user, than he knows about himself.

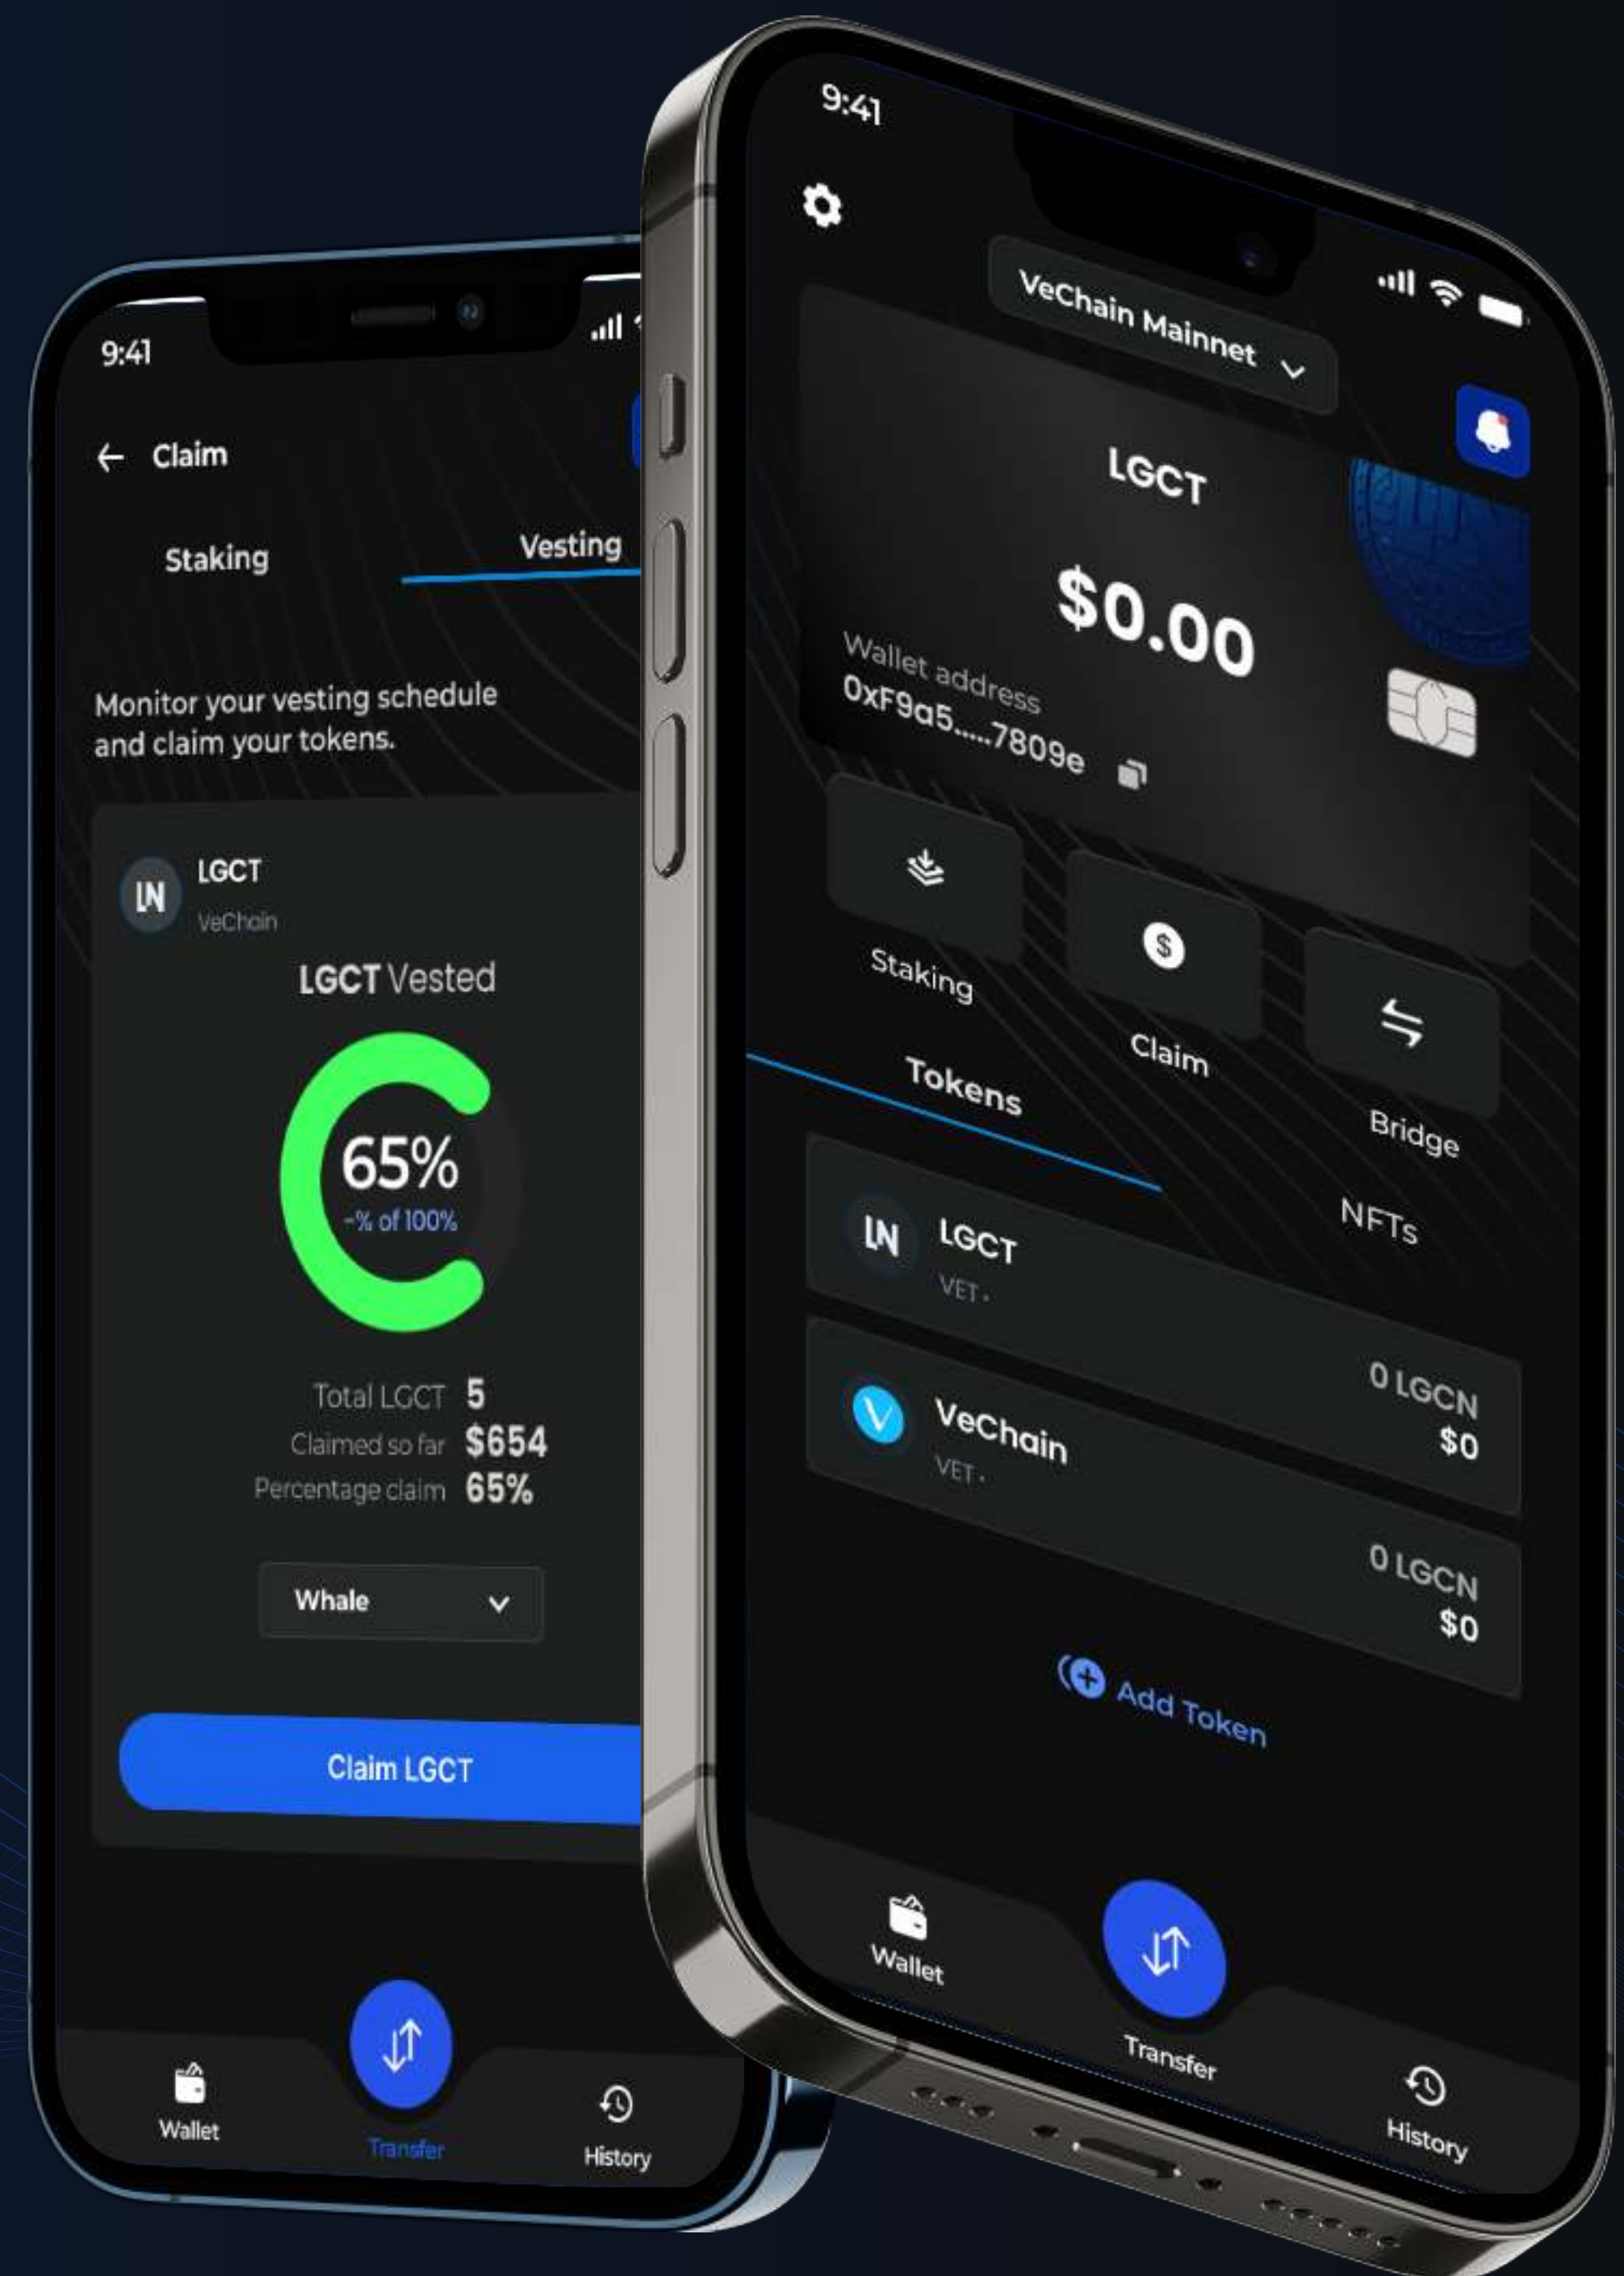

It will be able to find **errors in a person's behavior, thinking and habits** which lead to failure in certain important life areas. By systematically adjusting these things, the user will experience a **great improvement in his life quality**.

- Analyzes your personality, behavior patterns and much more
- Delivers individual strategies for your personal success
- Grants you access to valuable data about yourself
- Guides you step by step through the Game of Life

Legacy Wallet

A Non-Custodial Multi-Chain Wallet

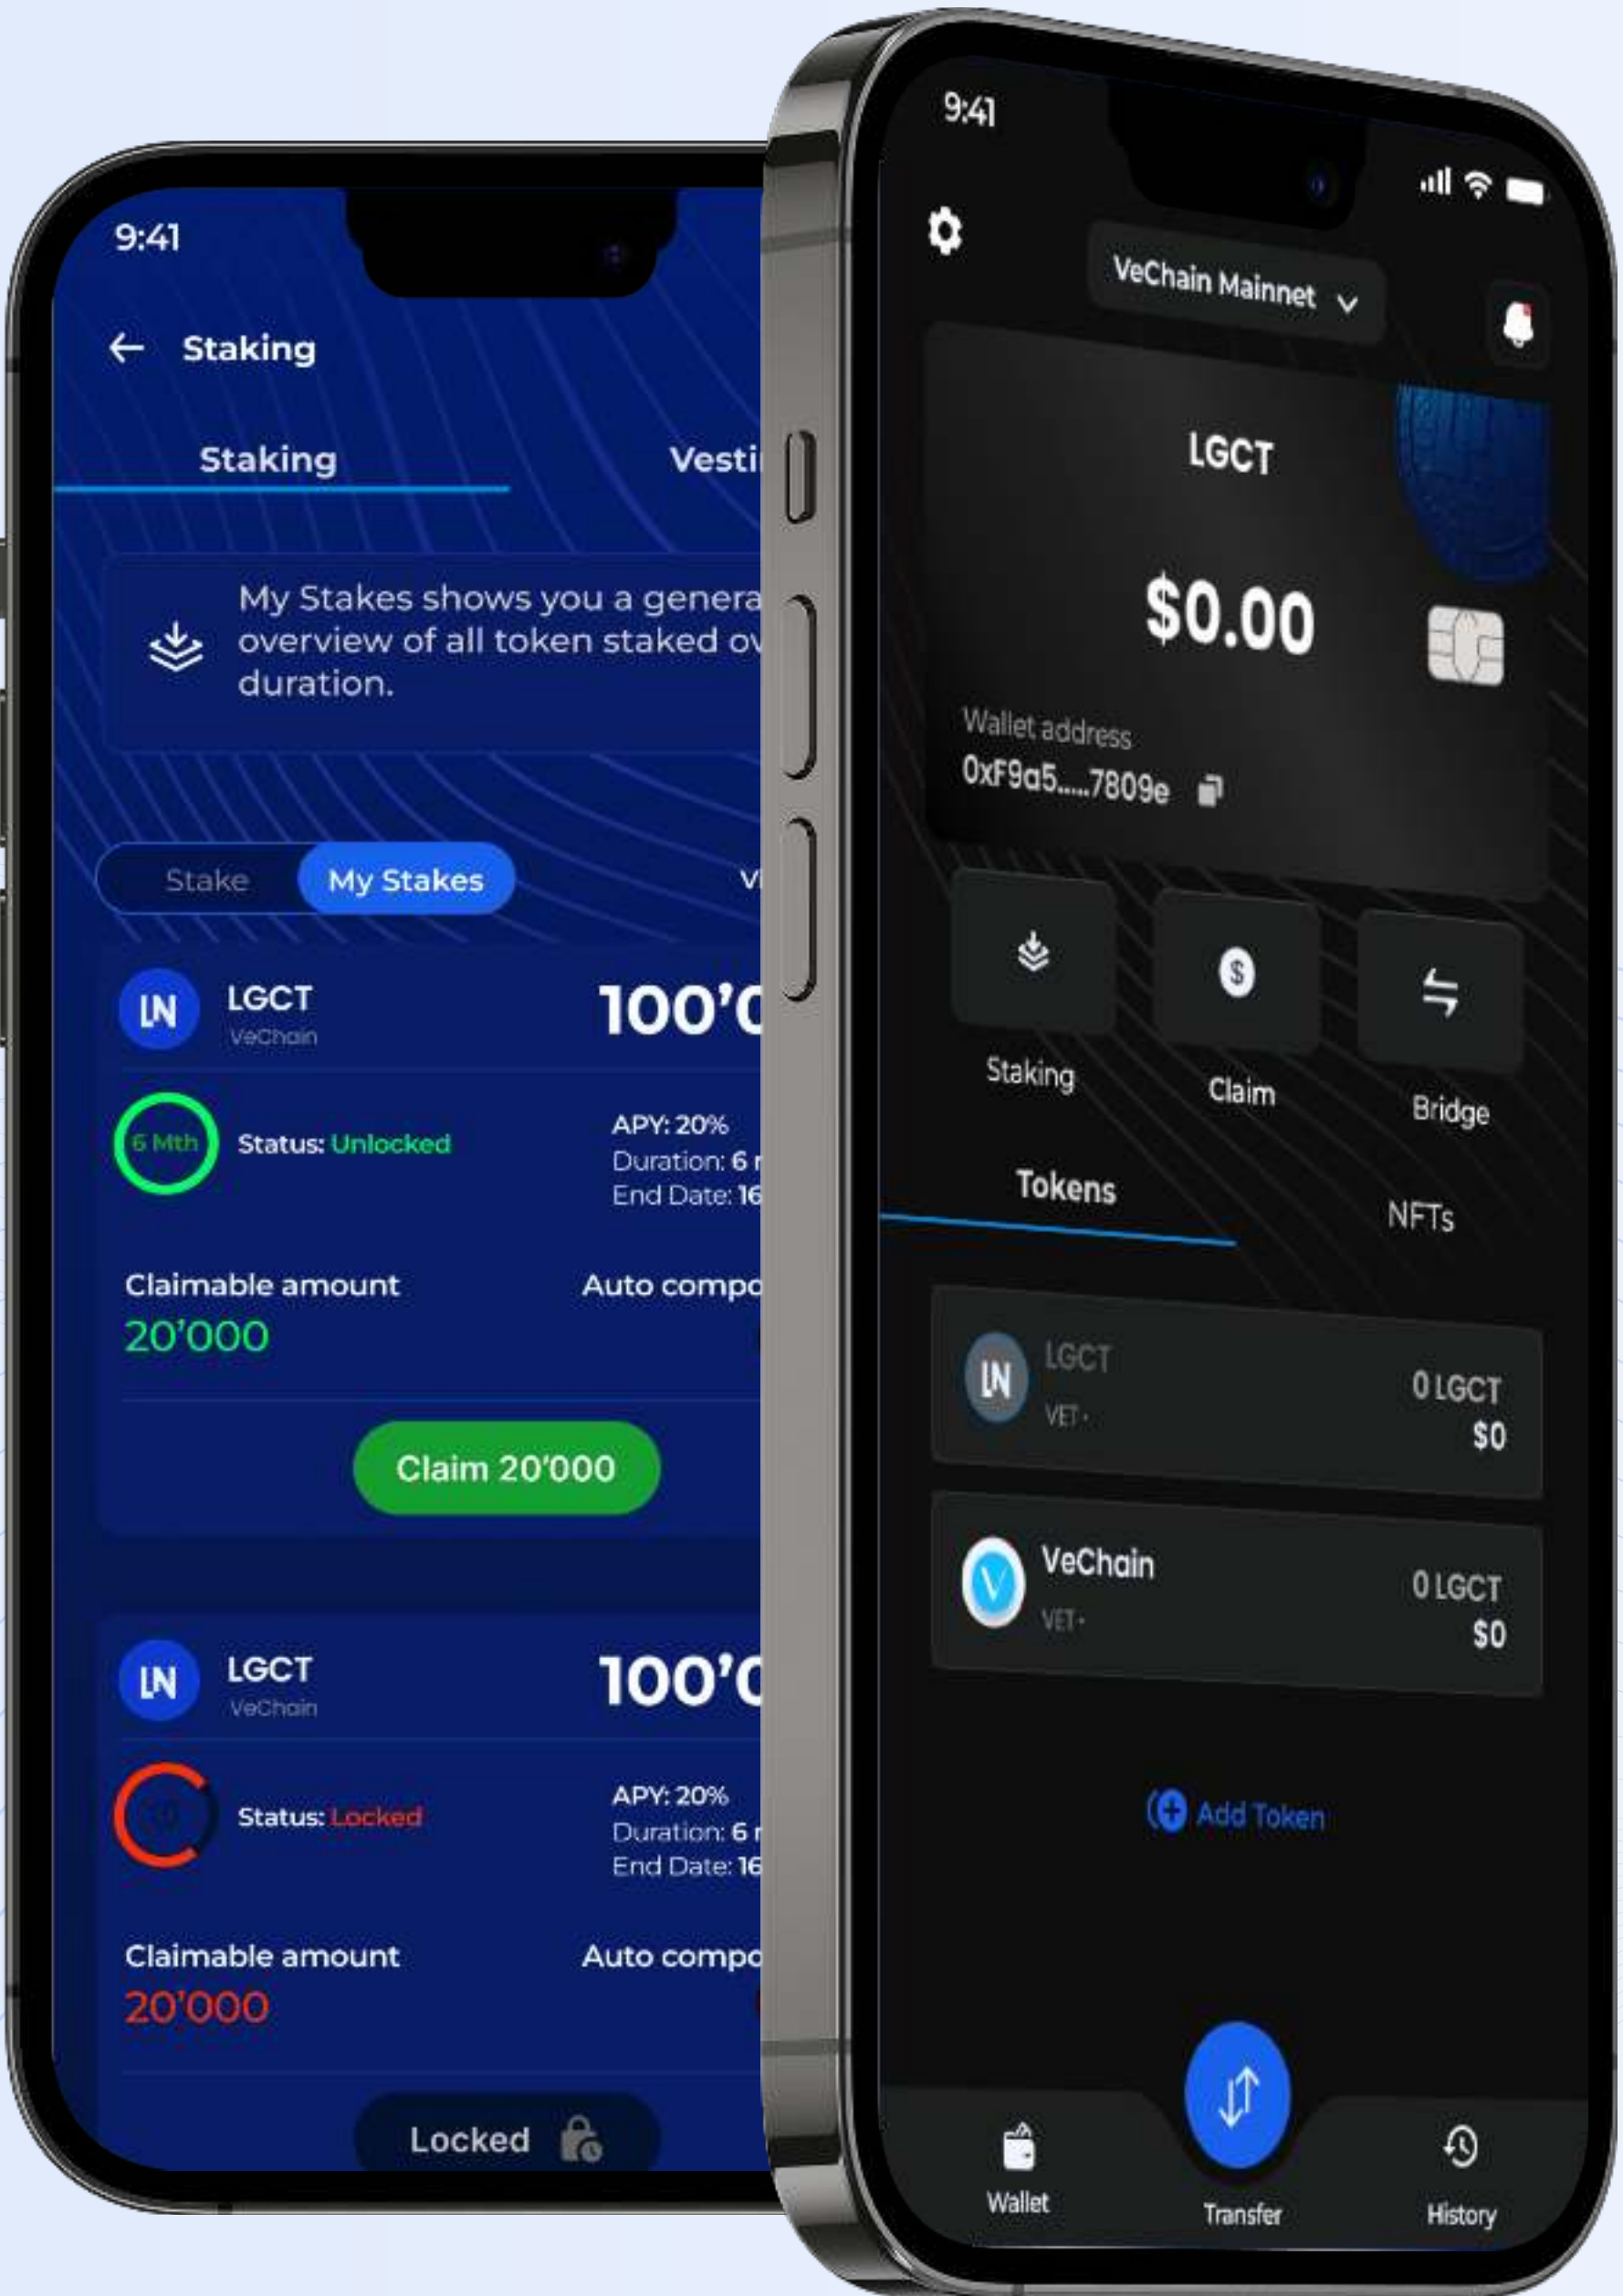

Legacy Wallet

Our non-custodial wallet allows users to **manage** their favorite cryptos in a secure and easy way. Features include **holding, sending and receiving tokens on multiple blockchains**, storing private keys locally on the device, browsing NFTs in one place and accessing the Web3 world via browser extension. Users can also **stake LGCT** for exclusive rewards and have the option to profit from our auto-compounding feature. Vested tokens can be claimed in real-time directly in the wallet. Our **integrated multi-chain bridge** allows secure and fast token bridging between currently four supported blockchains using atomic swaps. All **contracts are audited** for high security and performance.

Key-Functions:

- Only one wallet address for all coins/tokens no matter on which blockchain
- First ever in-app multi-chain bridge for VeChain, Ethereum, Binance Smart Chain & Polygon
- NFT holding and displaying function
- Comes with its own browser extension
- More exciting features in future

Legacy Token

A multichain utility & payment token

What is LGCT

The **Legacy Token (LGCT)** is a multichain utility and payment token. Its purpose is to encourage users to use our ecosystem and actively contribute to its growth.

Utility of the Legacy Token (LGCT)

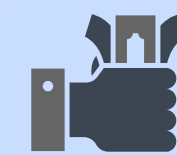

Play to earn: Distribution of reward chests for reaching a new level. Chests can include LGCT, collectibles and other items.

Staking, respectively freezing tokens in a non custodial wallet to get access to benefits.

Distribution of tokens to users who perform a service within the ecosystem.

Payment of various **in-app purchases** (digital content) with LGCT.

Blockchain

The **Legacy Token** will be available on **multiple blockchains**. **VeChain** as native blockchain, as well as **Binance smart chain**, **Ethereum** and **Polygon**. The goal of multiple blockchains is to address as broad a target group as possible, as well as to use the individual advantages of the respective blockchains. The circulation supply of the respective tokens is balanced by means of **atomic swap**, so that the statistics of the tokens cannot change independently of each other. For transferring tokens between the different blockchains, the new **cross-chain bridge** of safeswap is used.

This offers the following advantages:

1. We pay for the bridge integration, so our users don't have to pay bridge fees.
2. The bridge enables secure and simple atomic swaps between the respective blockchains.

Tokenomics

Our main goal is to create a **real utility token** with constant, non-speculative buy-side pressure. Due to our approach of offering a non-financial utility outside of the blockchain industry, the demand for our utility is expected to **not decrease in a bear-market**. The **subscription is paid in LGCT**, this creates a constant monthly demand for the token. A share of the tokens which are paid for the subscriptions **flows directly back into the staking pool**, into the **play to earn pool** and into the **reward pool for NFT holders**. A small percentage goes to the Legacy Network company wallet. This percentage is used for the coverage of running costs and for the further development of our products and services. The remaining tokens get instantly burned which makes **LGCT deflationary**. A smart contract automatically sends them to a null address, this leads to a **decrease in the supply of LGCT** while the demand for the token is expected to constantly increase with the increasing demand for the offered utility.

Usability

It's in our best interest to make our **ecosystem accessible for everyone**, this includes people who do not participate in the crypto space. For this reason, we aim to design our systems in a way which makes them **usable without the need for technical knowledge**. Most processes will happen in the background so the user can lay back and enjoy our services without concerns. We achieve this goal by implementing multiple mechanisms such as **gas-free sponsoring** on VeChain and free **background bridging** of LGCT between multiple blockchains thanks to our SafeSwap integration.

Vesting schedule

All tokens from the allocation will **either be vested or locked in separate contracts** which makes them technically inaccessible. This allows us to **stabilize the price of LGCT** in its most vulnerable stage after the listing. The tokens will be released in an appropriate timeframe and the **vesting-schedule will be publicly communicated**.

Token Allocation

Legacy NFT

Unleash Your Tribe, Upgrade Your Game

Legacy NFT

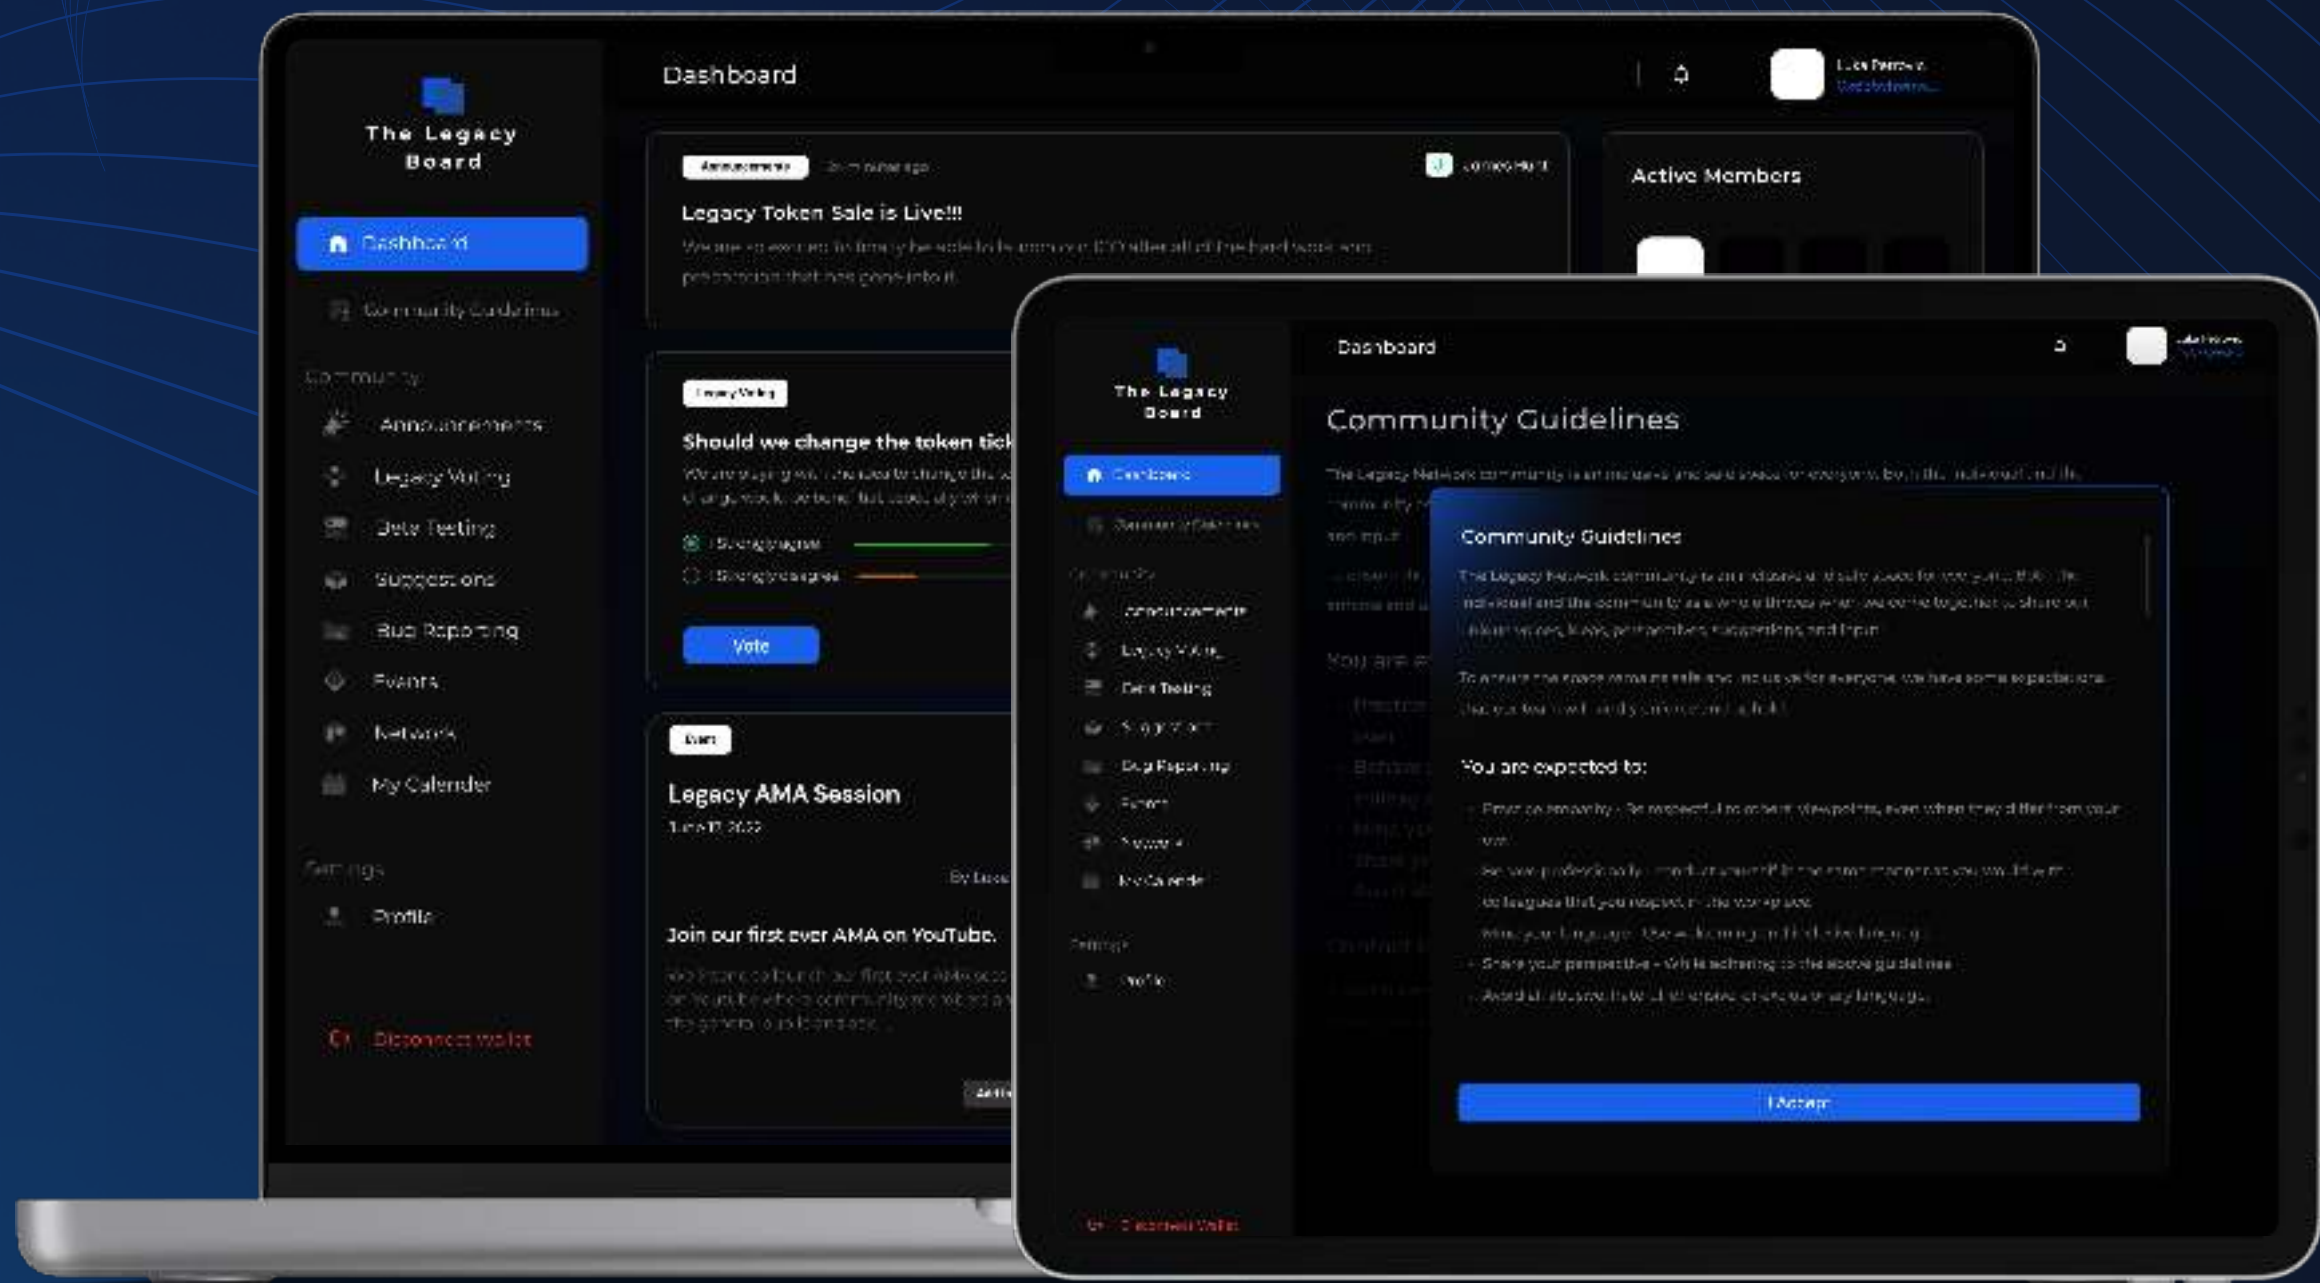

The Legacy NFT functions as an in-game character, that is a direct **reflection of the user**. The avatar has a unique set of features. There are **5 different tribes that hold The Legacy**. They come in different forms of animation, face props, armour, colour, and weapons. Each trait such as animation, face prop, etc. also has multiple tiers of rarity, resulting in unique and epic combinations for the user.

Why do we need an NFT?

One of our goals is to break common patterns and make our **app as playful as possible**. For this purpose, there will be an **animated 3D character**, which comes with a variety of utilities for the holder.

- Free access to our ecosystem
- Exclusive Reward distribution
- Access to special areas within the app
- Uniquely animated In-game character
- Higher play-to-earn reward
- Networking opportunities

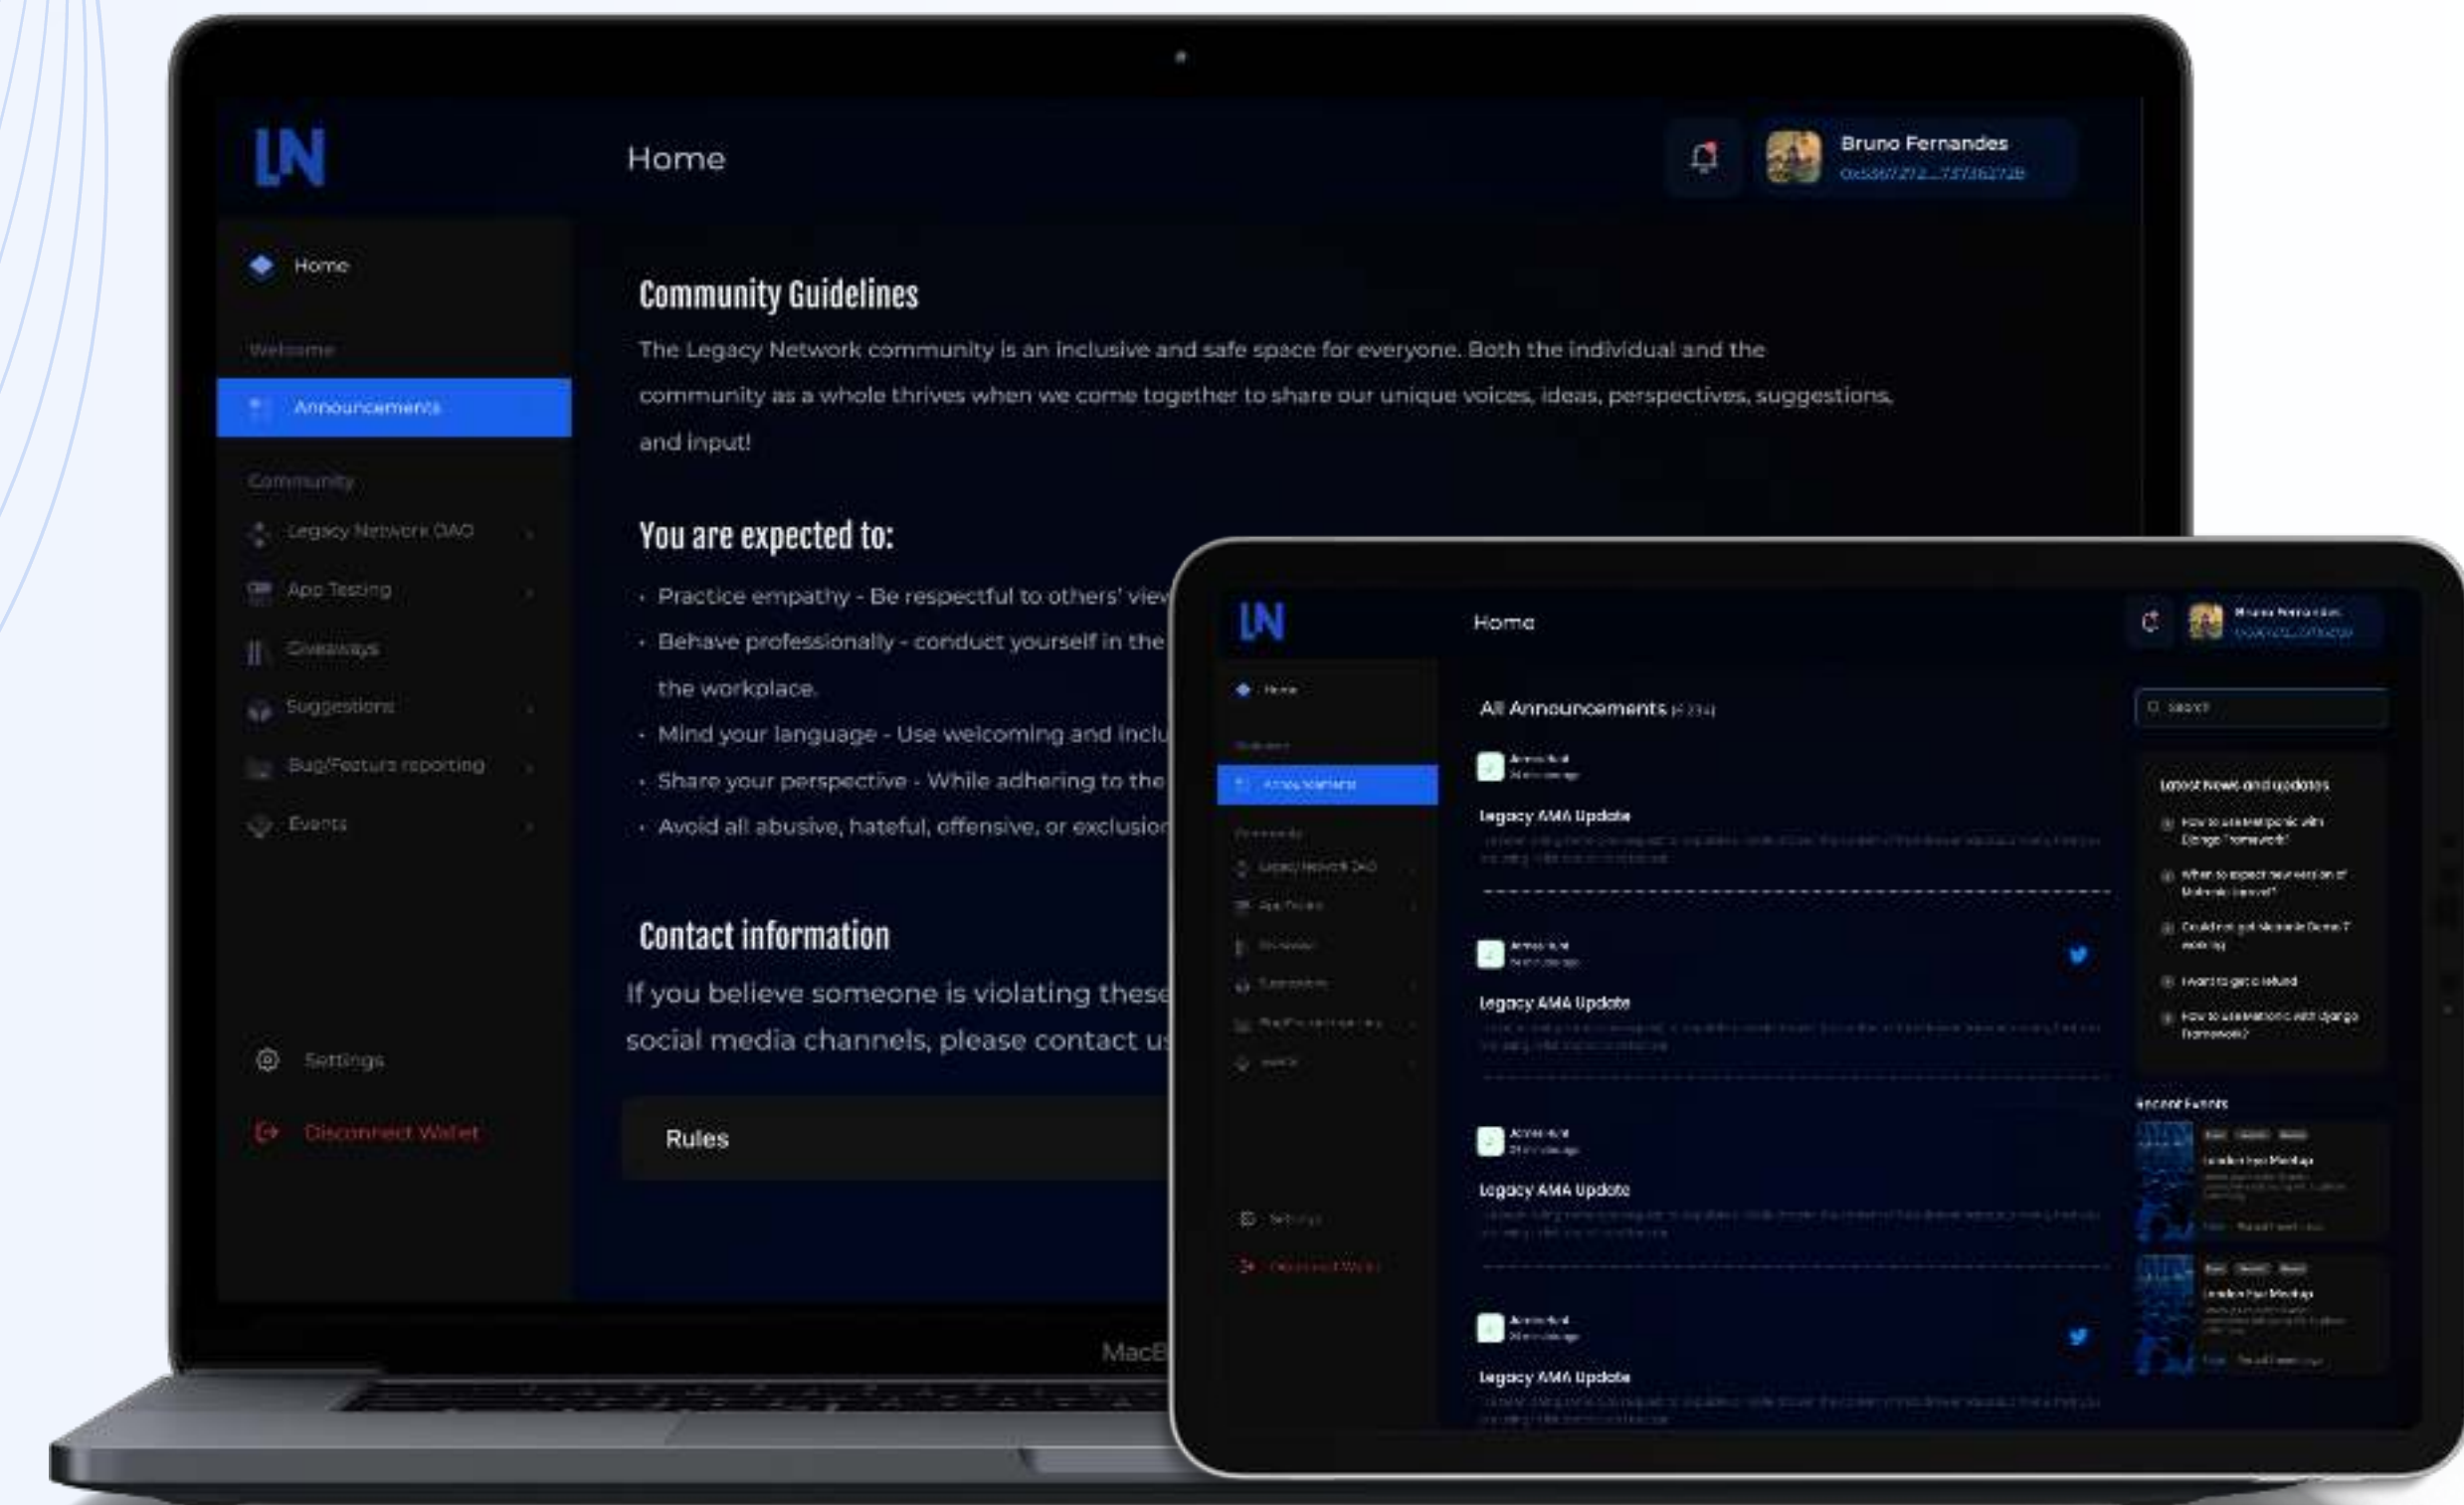

Legacy Boards

Building Together, Succeeding Together

Legacy Circle

Introducing the Legacy Circle: an **exclusive area for hand-picked individuals** and early supporters of our ecosystem.

- Partners can **Network with like-minded individuals** and gain access to exclusive perks such as partner events worldwide.
- Built in **web3 functionality** of our wallet. It allows users to have an overview of staking, vesting and funds.
- Partners will be invited to the **alpha version** of our products. The alpha is the first usable version of an application and it's available before the beta.
- Integrated overview of the current crypto market.
- Exclusive educational content which isn't available anywhere else.

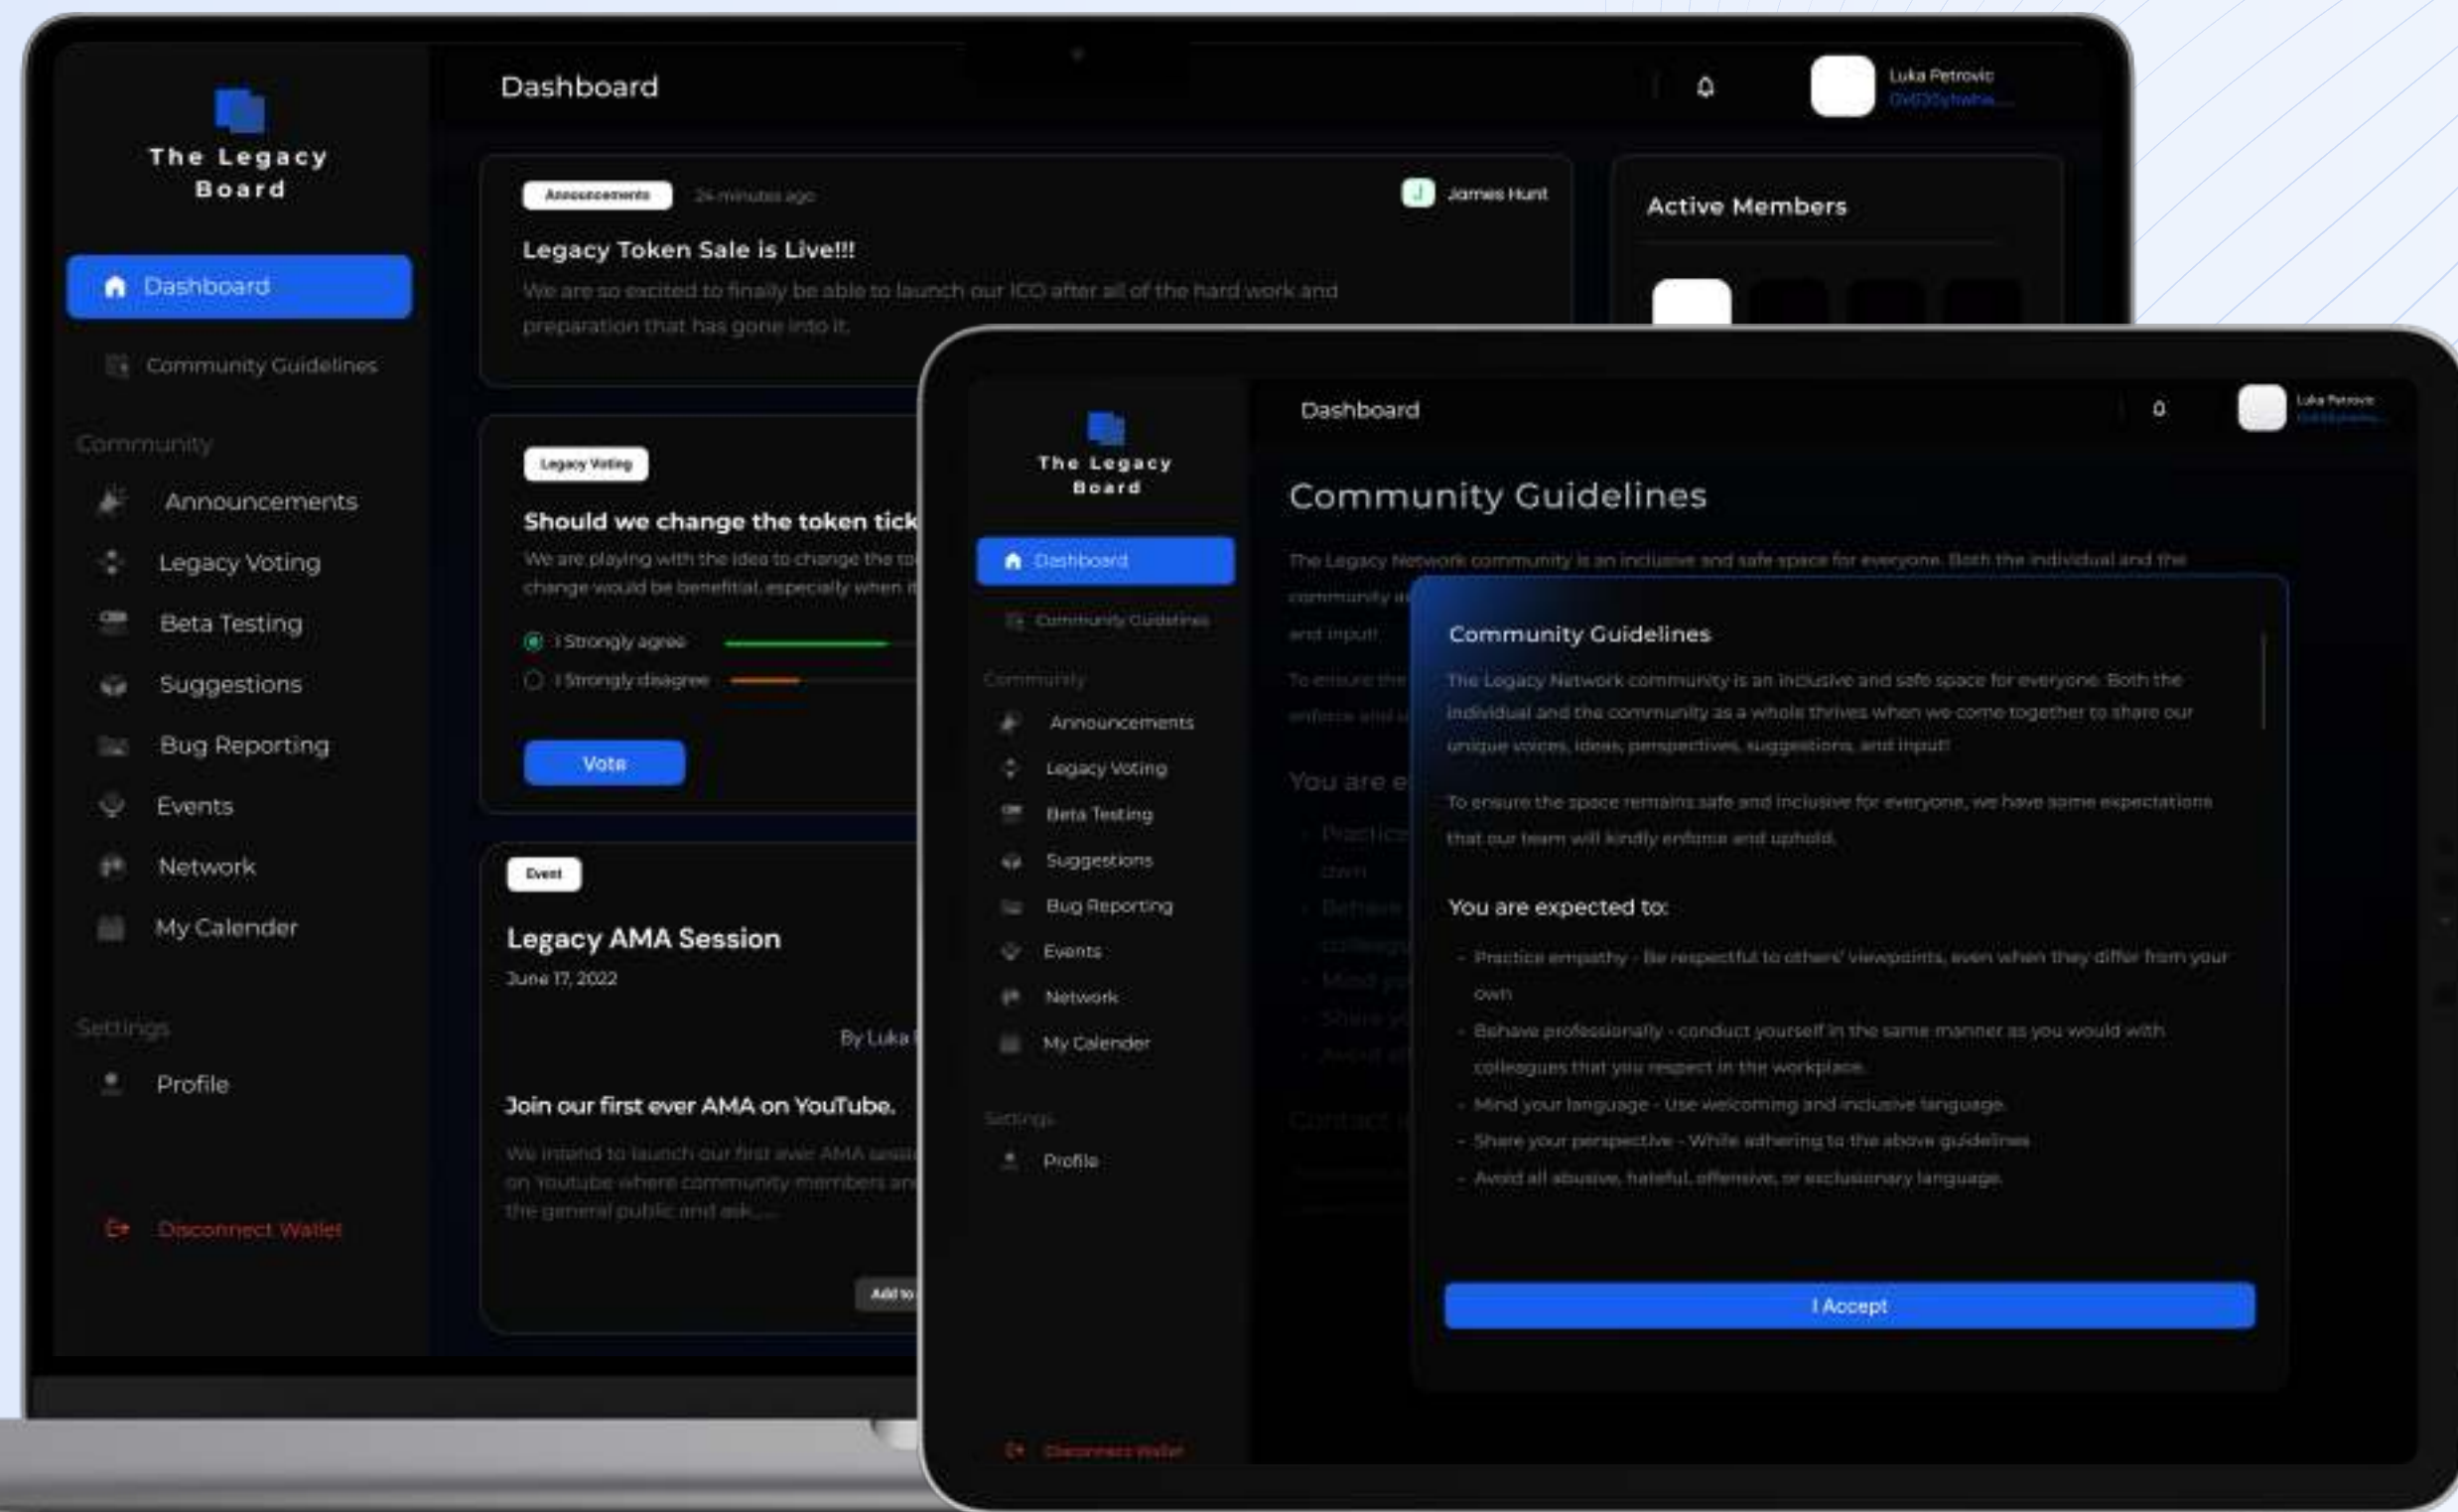

Community Board

A web3 hub where the Legacy Team and the community come together to interact with each other. This will give our members access to the dashboard, a place where **all important information can be found in one place.**

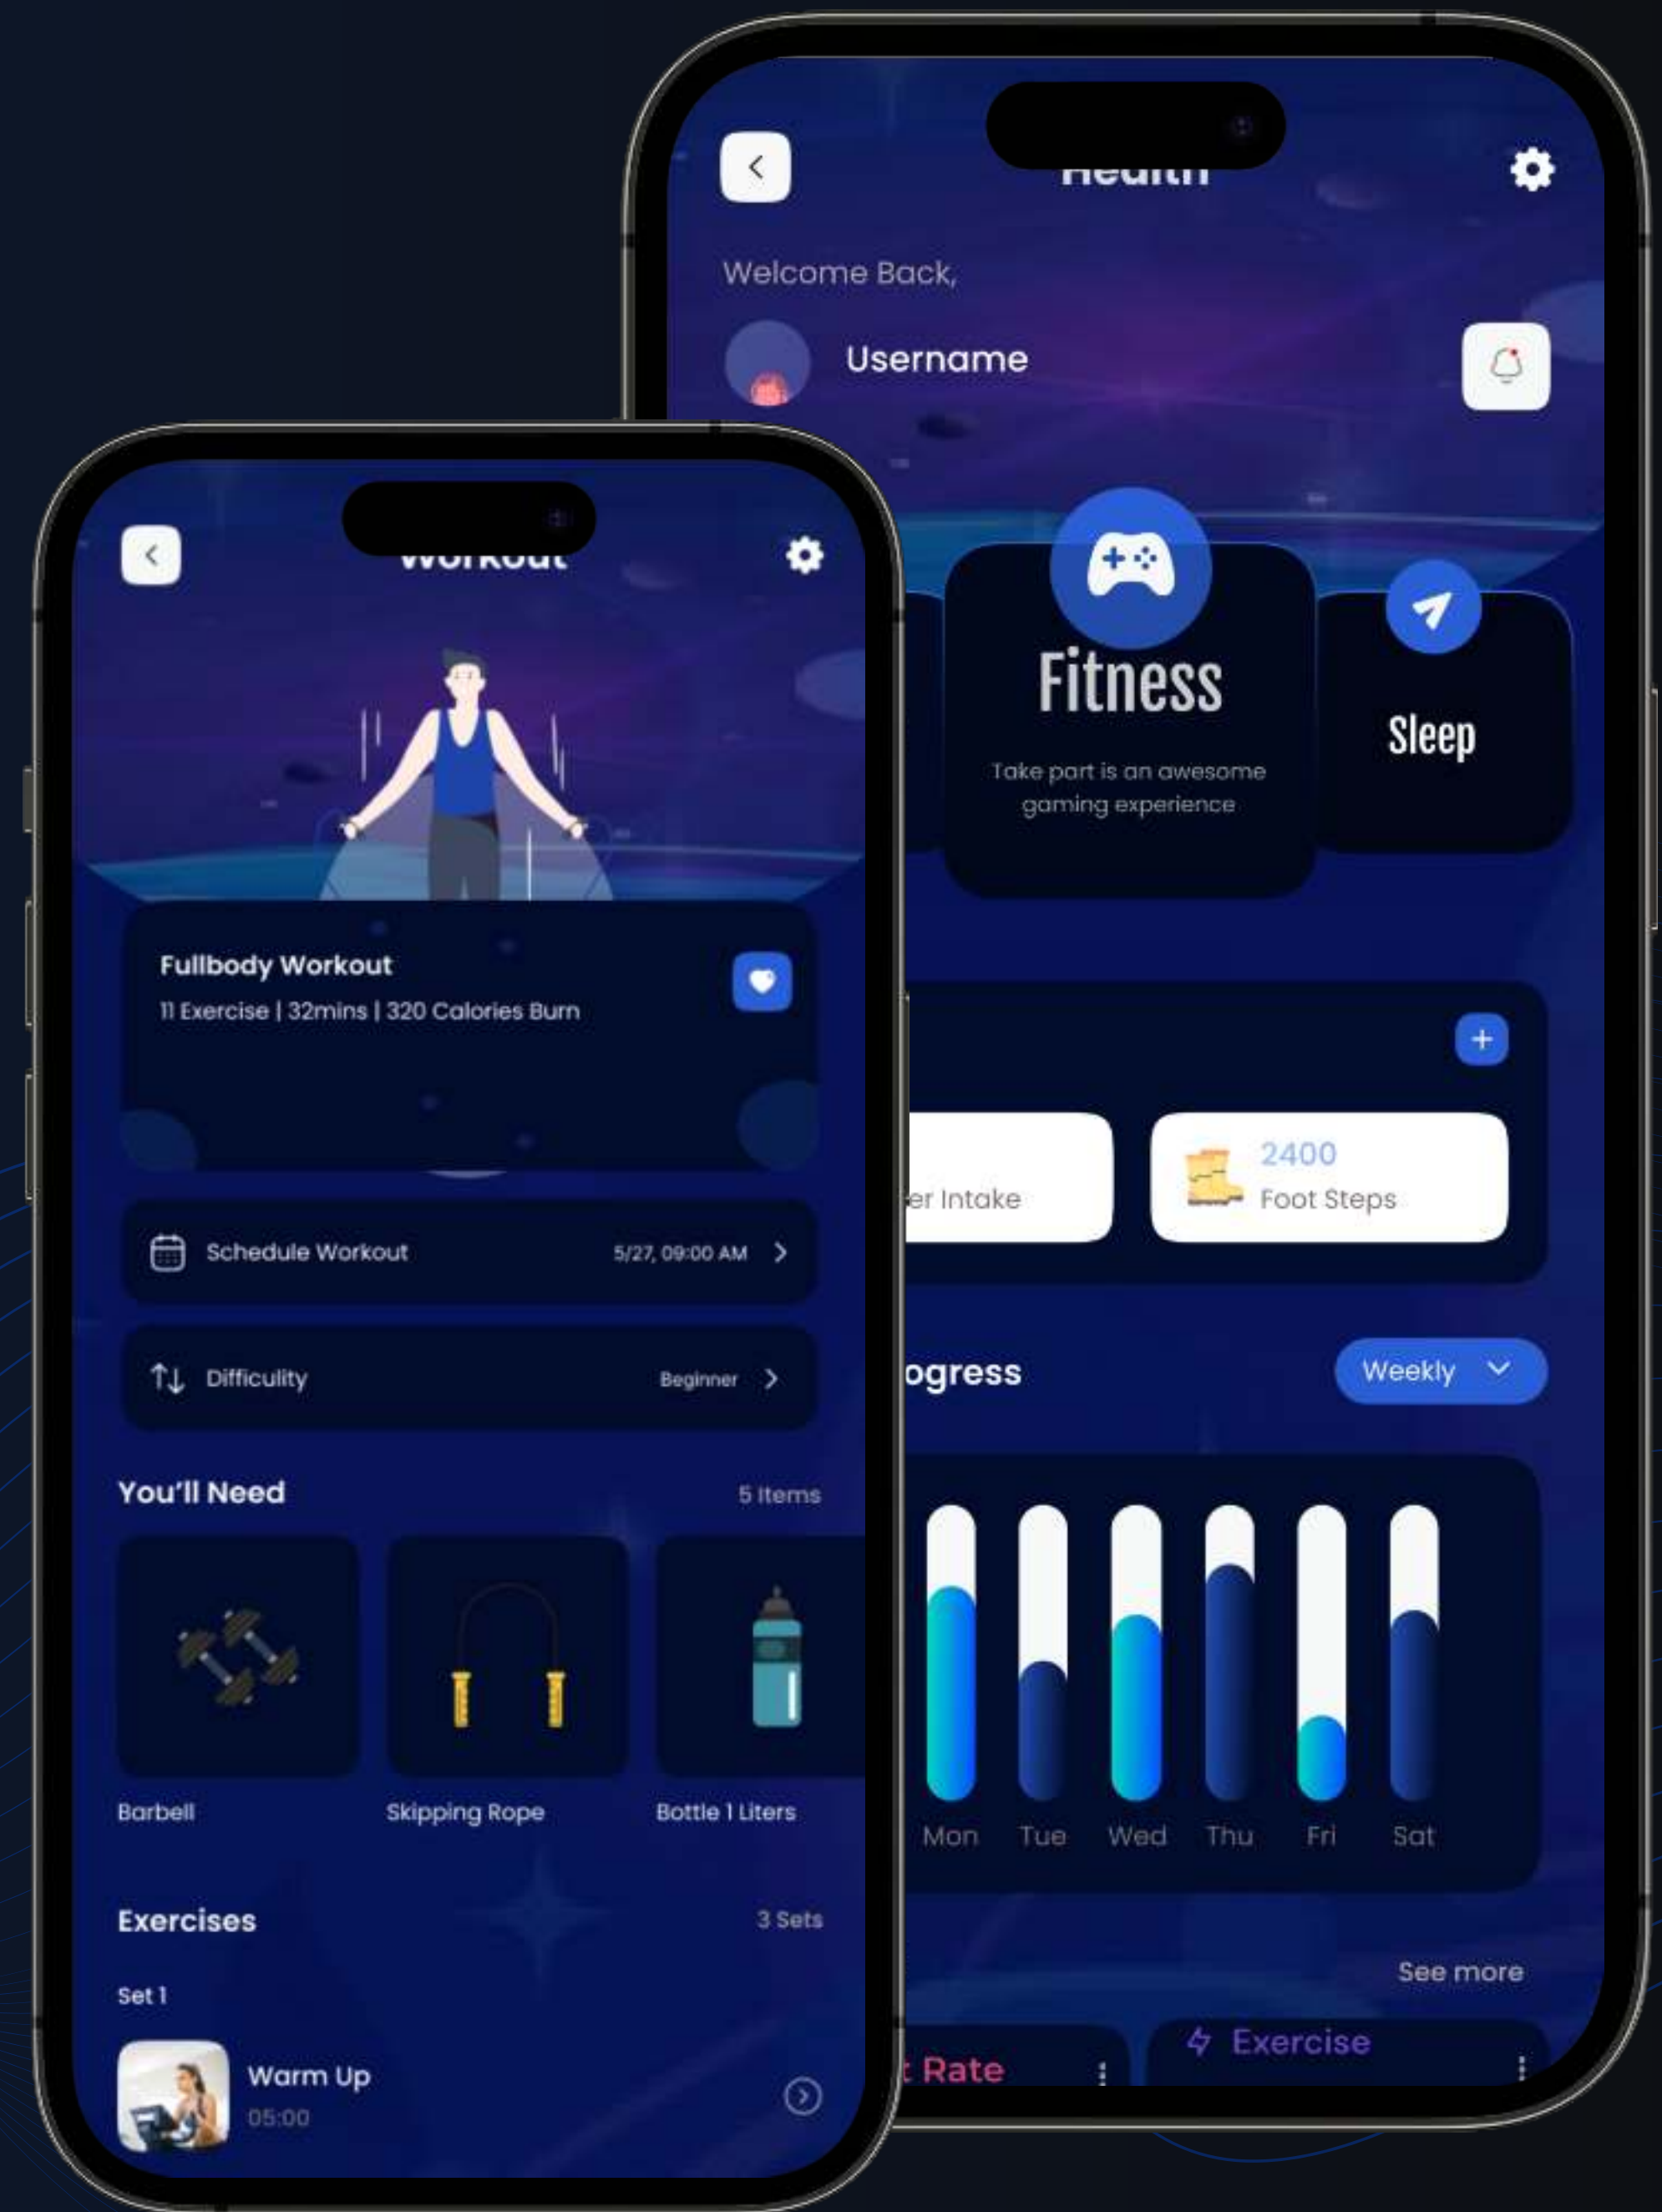

This is the best way for people to **interact with us**, stay informed, and make their voice being heard. Some of the dashboard features are:

- **Live-voting system** for proposals from the Legacy Team and the community.
- **Submission function** for the community to support us with creating the best possible product.
- **Statistics and data section** which displays the user's progress in the Legacy App.
- **Thread and Challenge system** with a reward distribution for the most active and helpful community members

Legacy Health

The all in one health app

Legacy Health

An innovative **productivity app focused on health**. Education is only one side of the success-coin, so we decided to enhance our digital ecosystem by another powerful tool. The Legacy health app is directly **connected to our other products** and comes with all necessary functions to keep our users healthy and productive.

- **Time Management & Routine Planning**

Calendar, reminders, different habits to choose from and insightful reports

- **Detailed nutritional analysis**

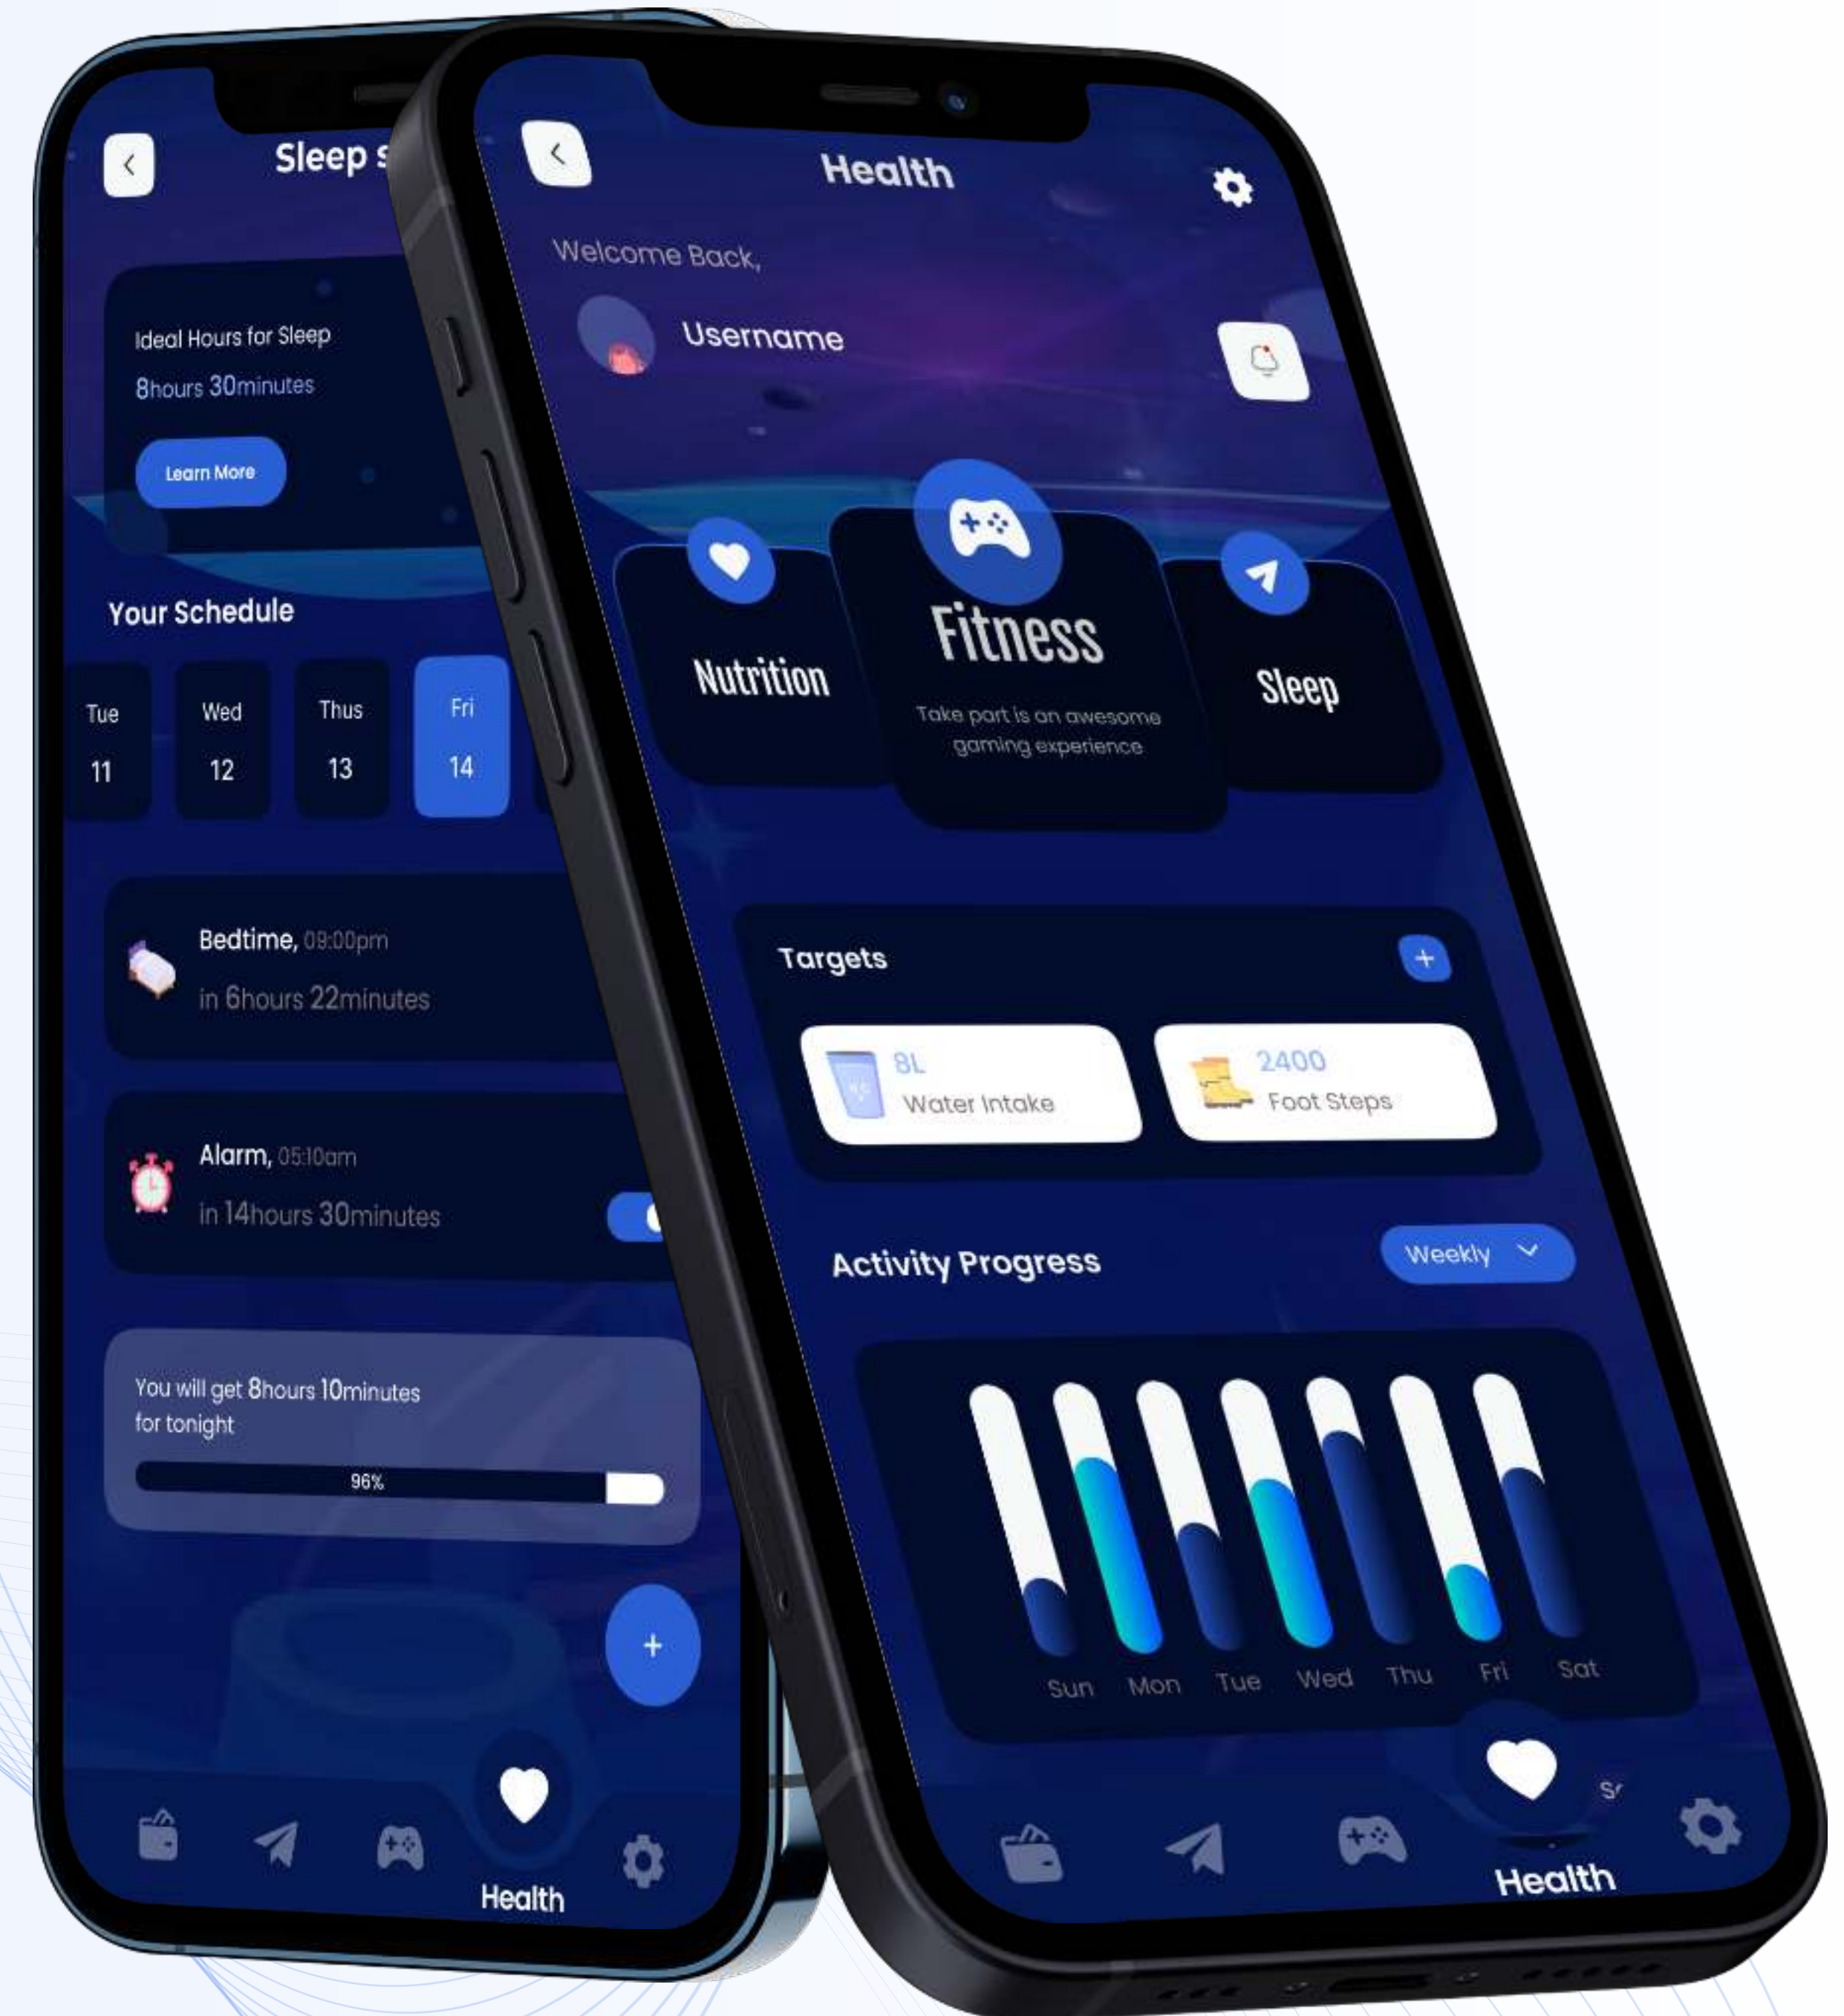

Macro and micronutrients consumed, calories consumed, identification of deficiencies, individual goals, etc.

- **Detailed sleep analysis**

Duration of falling asleep, total sleep duration, quality of sleep, sounds during sleep, etc.

- **Physical health**

Fitness progress tracking that comes with an individual gym plan.

Q3 2022

- Announcement of new utilities
- Launch of our new website
- Alpha testing of the wallet
- Expansion of our teams

Q4 2022

- LGCT listing on the SafeSwap multi-chain bridge
- Token deployment on the blockchains
- Security audits of all smart contracts
- Beta testing of the Legacy Wallet

Q1 2023

- Legacy Wallet release for IOS and Android
- Pre-listing on coinmarketcap
- Start of our web-based giveaway and referral program

Q4 2023

- End of the Giveaway
- Legacy Academy launch
- LGCT listing on a centralized exchange
- Ambassador Program for the Legacy Academy
- Legacy NFT Announcement

Security

Gain control over your data back

Data Protection

Part of our vision is to **give people back control of their data**. Legacy Network is the first technology company to use users' data and psychology **exclusively for them**, not against them. Unlike various Big Data corporations, **we will not monetize data** and thus **will not make our platforms available for serving ads**. Although **user profiles** will be created, these **cannot be assigned to a real person**, as we will not collect any personal data such as name or address. In this way, users can interact with each other **anonymously and without concern**. Nevertheless, to ensure the security of the network, some Internet-related data such as the user's IP address will be collected. This offers the possibility, in an emergency (for example, in case of a crime or threat), to support the responsible investigating authorities and to exclude users from the network in the event of gross violations. A concrete **data protection concept** will be worked out during development together with experts.

Cyber Security

To ensure the security of our entire ecosystem, we will have **several independent security audits performed**. This concerns the token, or smart contract, as well as the app and all platforms. We will **analyze past cyber-attacks on other systems** and design our own systems to be immune to these as well as other attacks.
